China signals tough trade stance as U.S. officials push negotiations

The U.S. flag is seen in the wine section of a supermarket in Beijing

BEIJING/WASHINGTON (Reuters) - China would win any trade war with the United States, the country's state media said on Thursday, as U.S. officials sought to ease market jitters over escalating tensions between the world's two biggest economies. Sports utility vehicles (SUVs) waiting to be exported are seen at a port in Lianyungang, Jiangsu province, China April 5, 2018. REUTERS/Stringer

After Washington and Beijing targeted each other with planned steep tariffs, Chinese state media declared that the country never surrendered to external pressure and would prevail in any tit-for-tat on trade.

In Washington, U.S. officials emphasized a desire for negotiations as a way to ease or avert punishing tariffs and get the two countries off a trade war footing. The dispute has roiled global markets, but stocks rose on Thursday as investors responded to comments from U.S. officials seeking to soothe concerns about a trade war.

China launches WTO complaint on U.S. tariffs linked to IP issues
Brazil unclear on benefits of U.S.-China trade spat: minister
U.S. says tool chests from China, Vietnam are being dumped in U.S. market
"As part of this deal - and I think we are going to get a deal over a period of time - yes, I think these barriers will come down on both sides," Larry Kudlow, director of the White

House National Economic Council, told On reporters on Thursday.

U.S. President Donald Trump understands that economies do better when trade barriers are reduced rather than raised, Kudlow said, and that tit-for-tat tariffs do not work for the economy in the long term.

"It's all part of the, you know, fairly delicate, broad-based negotiation that's long overdue if it fixes things, it could have a great ending," Kudlow said.

Later in the day, Trump continued his tough talk, however, although providing few details about the current dynamic between the two nations.

"You probably saw that, for many years, no president wanted to go against China economically," he told a crowd at an event in White Sulphur Springs, West Virginia.

Even as U.S. markets remained stable on Thursday, investors struggled to make sense of the signals coming from the administration.

"I don't think anybody really knows what's going on. That's why you've seen the volatility we've seen," said Paul Nolte, portfolio manager at Kingsview Asset Management in Chicago.

"Investors aren't dealing with it well. What we're trying to figure out is how he handles policy and negotiation. We're still learning what to expect from his negotiating style."

Trump has wedded much of his economic message to the performance of the stock market, and White House aides insisted this week that any downturn as a result of the trade standoff would be momentary.

Hundreds sue engineering firm over Harvey flooding in Fort Bend levee district

Hundreds of Fort Bend County residents sued a local engineering firm Wednesday alleging the company acted negligently in designing a stormwater management system for a local community that flooded during Hurricane Harvey.

The lawsuit filed against Costello, Inc. in state district court focuses on work the engineering firm performed more than a decade ago for a Fort Bend Levee Improvement District.

The district, known as LID 19, was designed to protect the Riverstone community from inundation, but roughly a third of the 1,760 homes in the district flooded last August.

“The stormwater management system was not designed to handle rainfall amounts that should have been reasonably anticipated,” the plaintiffs’ attorneys wrote in the complaint. “As a result of defendant Costello’s acts and omissions, plaintiffs and their children have been displaced from their homes and have many months and years of costly repairs and rebuilding to come.”

The lawsuit seeks damages for repairs, lost property value, lost income and emotional distress, among other flood-related costs. A representative for Costello, Inc. did not immediately respond to a request for comment. The engineering firm was founded by Steve Costello, Houston Mayor Sylvester Turner’s so-called “flood czar.”

A levee protects portions of the Riverstone neighborhood where Steep Bank Creek runs toward the Brazos River. The flood gates through which the creek normally flows closed during Hurricane Harvey to keep water from the Brazos from flowing up the creek. But the pumps working to push out water inside the levee could not keep up with the amount of runoff and rain, and many homes along the creek flooded.

Harris County’s recovery from Harvey may hinge on state funds

Harris County’s recovery from Hurricane Harvey may hinge on receiving aid from the state, but Gov. Greg Abbott’s reluctance to tap into the Rainy Day Fund is hindering it, Harris County judge Ed Emmett said. Harvey’s record setting flooding in Texas will cost an estimated \$150 billion in damages.

Emmett said that after Harvey struck, his job has shifted toward recovery efforts.

While Abbott gave \$50 million in state funds to the city of Houston to avert

a tax hike back in October, Harris County hasn’t received funding for projects to help prevent future flooding.

“If this wasn’t a rainy day, then I don’t know what was. They’re saying, ‘We’ll get to that.’ I’m afraid they’re not going to get to it,” Emmett said.

Among the projects Emmett said the county seeks to undertake are updating the flood maps, dredging the San Jacinto River, constructing a third reservoir and converting both Lake Houston and Lake Conroe into flood

control facilities.

The projects are part of Emmett’s 15-point plan to prevent flooding in the future.

The third reservoir alone is estimated to cost \$500 million.

“We’ve got a lot to do and we don’t have the money to pay for it,” Emmett said. For residents who live along Cypress Creek in northwest Harris County, it would help prevent catastrophic flooding.

When originally built, the Addicks and Barker dams didn’t have residents living in the area, which were flooded during Harvey and then afterward during a

controlled release.

Other homes along creeks were also affected during the storm.

“When they built all that, nobody bothered to keep track of where the old tributaries were,” Emmett said. “Mother Nature has long memory. When the waters got high enough, it went back to its old flow pattern.”

Various businesses closed once the Harvey’s waters subsided in Precinct 4.

The justice of the peace courthouse on Cypresswood Drive had up to four feet of water and closed to the public due to repairs.

Four branches of the Harris County Public Library located north and northwest of the county also closed due to flood damage.

The Barbara Bush, Katherine Tyra and Kingwood branches will reopen in May. The Baldwin Boettcher branch will remain closed after suffering from repeated flooding in recent years.

County officials will decide whether to reopen in a different location. Adjacent to Baldwin Boettcher, Mercer Botanic Gardens reopened in February.

Can Cellphones Cause Cancer? Experts Surprised By Latest Tests

Compiled And Edited By John T. Robbins, Southern Daily Editor

PITTSBURGH (KDKA) – Can cellphones really cause cancer? It's been a question that's dogged researchers for years.

However, a group of experts say the results of some tests are pretty surprising.

Millions of people constantly call, text, click, take pictures and play on cellphones.

Even the top cellular radiation researchers from around the world have a hard time untethering.

But, they gathered recently in North Carolina to talk about cellphone concerns and whether they really do increase the chances of developing cancer.

The panel voted that the results from years of testing on mice and rats were more significant than originally thought.

They say they found clear evidence that phone radiation caused tumors in the hearts of rats, which were similar to tumors in people.

"In humans, it's seen in the vestibular nerve, in the ear, the acoustic nerve. We found it in the heart, although our animals were exposed in their whole body condition," John Bucher said.

"While a given animal is not making a cellphone call, they are, throughout their short two-year lifetime getting the same exposure that we expect people to get in their 70-plus years of life," Dr. Devra Davis, of Environmental Health Trust, said.

Activists are now calling for more protections, citing separate studies from France and Italy.

"Many brain tumor lawsuits going on right now that are waiting for a study like this to prove that people's brain tumors were caused by their cellphone radiation," Kevin Mottus, of the California Brain Tumor Association, said.

There are new concerns on the horizon as 5G, which is a stronger broadband system, is about to debut.

Some activists say the government has a responsibility to increase regulations.

"And I think it's the responsibility of the ones making the phones to make them as safe as possible, and I'm sure they can do better than what we actually have," Dr. Annie Sasco said.

Both activists and researchers agree that people can minimize any risk by holding phones away from the body when in use and not putting them in your pocket. (Courtesy <http://pittsburgh.cbslocal.com>)

Related

Why is there concern that cell phones may cause cancer or other health problems?

There are three main reasons why people are concerned that cell phones (also known as "mobile" or "wireless" telephones) might have the potential to cause certain types of cancer or other health problems:

Cell phones emit radiofrequency energy (radio waves), a form of non-ionizing radiation, from their antennas. Tissues nearest to the antenna can absorb this energy.

The number of cell phone users has increased rapidly. As of December 2014,

there were more than 327.5 million cell phone subscribers in the United States, according to the Cellular Telecommunications and Internet Association. This is a nearly threefold increase from the 110 million users in 2000. Globally, the number of subscriptions is estimated by the International Telecommunications Union to be 5 billion.

Over time, the number of cell phone calls per day, the length of each call, and the amount of time people use cell phones have increased. However, improvements in cell phone technology have resulted in devices that have lower power outputs than earlier models.

The NCI fact sheet Electromagnetic Fields and Cancer includes information on wireless local area networks (commonly known as Wi-Fi), cell phone base stations, and cordless telephones.

WHAT GOVT PANEL RECOMMENDS

- Continuous online monitoring and display of radiation level in mobile network frequency range at prominent places in cities and online data transfer to the central server
- New-tech low power transmitters within building solutions for the future expansion of telecom network
- SAR level should be displayed on handset
- SAR level for handsets be limited to 1.6 watt/kg average over a 6-minute period & taken over a volume containing mass of 1 gram of human tissue
- List of SAR values for handsets be uploaded on DOTTEC website

What is radiofrequency energy and how does it affect the body?

Radiofrequency energy is a form of electromagnetic radiation. Electromagnetic radiation can be categorized into two types: ionizing (e.g., x-rays, radon, and cosmic rays) and non-ionizing (e.g., radiofrequency and extremely low frequency, or power frequency). Electromagnetic radiation is defined according to its wavelength and frequency, which is the number of cycles of a wave that pass a reference point per second. Electromagnetic frequencies are described in units called hertz (Hz).

The energy of electromagnetic radiation is determined by its frequency; ionizing radiation is high frequency, and therefore high energy, whereas non-ionizing radiation is low frequency, and therefore low energy. The NCI fact sheet Electromagnetic Fields and Cancer lists sources of radiofrequency energy. More information about ionizing radiation can be found on the Radiation page.

The frequency of radiofrequency electromagnetic radiation ranges from 30 kilohertz (30 kHz, or 30,000 Hz) to 300 gigahertz (300 GHz, or 300 billion Hz). Electromagnetic fields in the radiofrequency range are used for telecommunications applications, including cell phones, televisions, and radio transmissions. The human body absorbs energy from devices that emit radiofrequency electromagnetic radiation. The dose of the absorbed energy is estimated using a measure called the specific absorption rate (SAR), which is expressed in watts per kilogram of body weight.

Exposure to ionizing radiation, such as from x-rays, is known to increase the risk of cancer. However, although many studies have examined the potential health effects of non-ionizing radiation from radar, microwave ovens, cell phones, and other sources, there is currently no consistent evidence that non-ionizing radiation increases cancer risk (1).

The only consistently recognized biological effect of radiofrequency energy is

heating. The ability of microwave ovens to heat food is one example of this effect of radiofrequency energy. Radiofrequency exposure from cell phone use does cause heating to the area of the body where a cell phone or other device is held (ear, head, etc.). However, it is not sufficient to measurably increase body temperature, and there are no other clearly established effects on the body from radiofrequency energy.

It has been suggested that radiofrequency energy might affect glucose metabolism, but two small studies that examined brain glucose metabolism after use of a cell phone showed inconsistent results. Whereas one study showed increased glucose metabolism in the region of the brain close to the antenna compared with tissues on the opposite side of the brain (2), the other study (3) found reduced glucose metabolism on the side of the brain where the phone was used.

USING YOUR CELL PHONE A HALF HOUR PER DAY INCREASES YOUR RISK OF BRAIN TUMOR BY 40%

THE TRUTH About CANCER

Another study investigated whether exposure to the radiofrequency energy from cell phones affects the flow of blood in the brain and found no evidence of such an effect (4).

The authors of these studies noted that the results are preliminary and that possible health outcomes from changes in glucose metabolism are still unknown. Such inconsistent findings are not uncommon in experimental studies of the biological effects of radiofrequency electromagnetic radiation (5). Some contributing factors include assumptions used to estimate doses, failure to consider temperature effects, and lack of blinding of investigators to exposure status. The US economy seems back on track after a brutal set of hurricanes—employers added 261,000 jobs in October and the unemployment rate edged down to 4.1%. While markets had expected a whopping 310,000 new jobs to replace the ones temporarily lost because of the hurricanes, the news is still good: Unemployment is now at its lowest since 2000, and job creation has edged up in stronger fashion. Still, the overall results are mixed. The labor force participation rate—which measures how many people are actively looking for jobs—fell. And the number of workers relative to the population as a whole also fell. “It’s important to note that this [the drop in the unemployment rate happened for all the wrong reasons—the result of workers leaving the labor force, not finding jobs,” warns Elise Gould, of the left-leaning Economic Policy Institute. What’s most concerning is that while jobs are plentiful, what people are actually getting paid has hardly grown.

Average hourly earnings for private workers have barely budged, growing just 2.4% in October from a year earlier. (This partially reflects the automatic fall in average wages from the previous month because of the return of workers in low-paid sectors temporarily kept from their jobs by hurricanes.) But in general, weak earnings growth has been a problem throughout Donald Trump’s presidency. For production and nonsupervisory private workers (i.e. non-managers) annual hourly wage growth adjusted for inflation was 0.1% in October. Inflation-adjusted wage growth has also been lower during Trump’s term than in recent years. (To be fair, real wage growth at the start of Obama’s term was so high because inflation had virtually disappeared.) The new numbers come as the Trump administration is pushing for a corporate-tax cut. Trump’s Council of Economic Advisors (CEA) believes that such a cut will boost annual earnings by \$4,000 for the average American. The evidence suggests otherwise: Analysis from the Tax Policy Center finds that Trump’s tax cuts will benefit foreign investors more than the middle class. Moreover, the CEA’s proposal relies on disputed models of how tax cuts affect wages and far outpaces others’ forecasts. (Here’s a close look at what the CEA report gets wrong.) Now, all eyes are on the Federal Reserve, and whether the Federal Open Market Committee will raise rates come December. Despite dismal wage growth for the average American, traders still believe a rate hike is

U.S. Monthly Inflation Moves Up With Jobless Claims At 48-Year Low

U.S. Labor Market Grows New Jobs But Wages Still Behind

imminent: Fed funds futures, after this morning (Nov. 3), still indicate a 90% chance of a December raise.

“Flat wages doesn’t concern us too much,” said Sean Lynch, co-head of global equity strategy at the Wells Fargo Investment Institute. “We do think wage pressure could start to weigh on the markets next year in a tight labor market.” (Courtesy <https://qz.com/>)

Related U.S. Consumer Prices Showed Increase In January With Underlying Inflation Gains

WASHINGTON (Reuters) - U.S. consumer prices increased in January, with a gauge of underlying inflation posting its largest gain in 12 months, bolstering views that price pressures will accelerate this year. Those expectations were underscored by other data on Thursday showing the number of Americans filing for unemployment benefits fell last week to a 48-year low as the labor market tightens. Another survey showed prices paid by manufacturers for raw materials hit a more than six-year high in February. The combination of rising inflation and a robust labor market could force the Federal Reserve to raise interest rates a bit more aggressively this year than currently anticipated as it worries about the economy overheating. The U.S. central bank has forecast three rate hikes in 2018. The first rate increase is expected later this month.

“The Fed wanted to see more inflation and it looks like it is getting it,” said Joel Naroff, chief economist at Naroff Economic Advisors in Holland, Pennsylvania. “I am down for four (rate hikes) because the acceleration in inflation is not likely to fade anytime soon.”

The Commerce Department said consumer

prices as measured by the personal consumption expenditures (PCE) price index rose 0.4 percent. That was the biggest increase since September and followed a 0.1 percent gain in December. The annual increase was, however, unchanged at 1.7 percent in January because of unfavorable base effects. Excluding the volatile food and energy components, the PCE price index advanced 0.3 percent in January - the largest gain since January 2017. The so-called core PCE price index rose 0.2 percent in December. Base effects also kept the annual increase in the core PCE price index unchanged at 1.5 percent in January. The inflation readings were in line with economists’ expectations. The core PCE index is the Fed’s preferred inflation measure and has undershot the central bank’s 2 percent target since mid-2012.

The core PCE index is the Fed’s preferred inflation measure.

Inflation is expected to rise toward its target this year also as a \$1.5 trillion tax cut package and increased government spending spur faster economic growth. Rising commodity prices as well as a weakening U.S. dollar are also seen stoking inflation. “All the ingredients are in place. We are going to see inflation perk up a little through the rest of this year, but there is no cause for concern,” said Ryan Sweet, senior economist at Moody’s Analytics in West Chester, Pennsylvania.

Fed Chairman Jerome Powell earlier this week offered an upbeat assessment of the economy, saying before the U.S. House of Representatives Financial Services Committee “my personal outlook for the economy has strengthened since December.” On Thursday, Powell told the Senate Banking Committee that there was no evidence of the economy overheating and also that “the thing we don’t want to have happen is to get behind the curve.”

The dollar initially firmed against a basket of currencies before surrendering gains to trade little changed. Prices for U.S. government bonds rose marginally while stocks on Wall Street fell.

Leaflets lie on a table at a booth at a military veterans’ job fair in Carson, California October 3, 2014. REUTERS/Lucy Nicholson

CONSUMER SPENDING COOLS

In another report, the Institute for Supply Management (ISM) said its index of prices paid by factories increased to a reading of 74.2 in February, the highest level since May 2011, from 72.7 in January. The ISM’s overall index of national factory activity jumped to a reading of 60.8 last month from 59.1 in January amid strong order growth and hiring. A reading above 50 in the ISM index indicates growth in manufacturing, which accounts for about 12 percent

of the U.S. economy. January’s increase in inflation cut into consumer spending growth. Consumer spending, which accounts for more than two-thirds of U.S. economic activity, gained 0.2 percent. That was the smallest increase since August and followed a 0.4 percent advance in December. When adjusted for inflation, consumer spending fell 0.1 percent, declining for the first time in a year. The so-called real consumer spending rose 0.2 percent in December.

The drop in real consumer spending in January suggests consumption will slow this quarter from the fourth-quarter’s robust 3.8 percent annualized growth pace.

It was also the latest indication that economic growth moderated at the start of the year after a 2.5 percent rate of expansion in the fourth quarter. Industrial production, home sales and core capital goods orders fell in January while construction spending was flat.

Growth estimates for the first quarter are as low as a 1.7 percent rate. But spending remains underpinned by a strong labor market. In a third report on Thursday, the Labor Department said initial claims for state unemployment benefits dropped 10,000 to a seasonally adjusted 210,000 for the week ended Feb. 24, the lowest level since December 1969.

Consumer spending could also get a lift from the tax cuts, which boosted income and savings in January. The Commerce Department’s Bureau of Economic Analysis estimates that the tax package reduced personal income taxes by \$115.5 billion at an annual rate.

People applying for jobs at a job recruitment center in New York City.

Income at the disposal of households after taxes surged 0.9 percent in January, the biggest gain since December 2012, after rising 0.4 percent the prior month.

Wages were also boosted by one-off bonuses that businesses gave workers as part of the tax-cut windfall. The saving rate jumped to 3.2 percent from 2.5 percent in December. “This will give consumers the necessary fire-power to ramp up their spending in the months ahead,” said Scott Anderson, chief economist at Bank of the West in San Francisco. - 3. 下載Apps收看：**可在蘋果商店搜尋「Today America」，下載Apps，除可用手機讀報更方便，也可以在Apps裡收看**STV15.3** 電視直播。
- 4. Google搜尋：**觀眾只要在Google網站搜尋「Southern TV- STV15.3 Houston」，或輸入該平台網址「<http://media.maqtv.com/?1497381&proc=1>」，就可直接連結美南國際電視直播平台。

春暖花開情慾逼人

《媿》 探討婚姻三人行道德極限

由余為彥執導、探討婚姻中的外遇現況的台灣電影《媿》，即將於4月20日在台上映。本片是台灣少見專注討論婚姻中的不忠對個人心理、生理殘害的電影，電影中的中產階級富商馬志志(張育邦 飾)，生活優渥出手闊綽，視婚姻為玩物，除了大膽與秘書偷情，還亂搞3P，放任慾望流竄。電影尺度之大，寫實反映現代社會常見的外遇亂象，並企圖剖析當代困惑迷惘的社會現況，是今年絕對不可錯過的優質國片之一。

余為彥是台灣少數具備編劇、導演、製片三棲能力的知名電影人。曾經與楊德昌導演共同打造許多膾炙人口電影，包括《牯嶺街少年殺人事件》、《獨立時代》、《麻將》、《一一》等，擔任監製與製片。余為彥執導的《月光少年》(1993年)，獲威尼斯電影節國際影評人周「最佳影片」及亞太影展「最佳編劇」獎；《童黨萬歲》(1989年)獲金馬獎「最佳影片」提名。

固定的外遇對象是身邊年輕的小秘書，辦公室是兩人淫聲浪語的偷情場所。因緣際會下，馬志志認識房產投資案合作夥伴的姪女白始(隋玲 飾)，白始既聰明、又知道如何挑逗男性，很快地馬志志就深陷慾望深淵。面對老公無情又放肆的背叛，許媛精神崩潰，一方面她不能原諒老公的不忠，一方面又好奇白始到底為何方神聖，轉而一步步接近白始……馬志志、許媛、白始交織出一段異色詭譎的情色金三角，本片劇情轉折高潮迭起，宛如台灣版的《控制》加上《色·誘》，有經歷過背叛、三角戀或思考婚姻奧義的觀眾，對本片會有極大共鳴。

《媿》入選2017年桃園電影節放映，並受邀泰國曼谷國際書展放映，導演余為彥也將參加本週4月6日在泰國書展的映後座談。台灣上映則為4月20日，屆時觀眾將會欣賞到張育邦、隋玲、汪琴的精湛演技。張育邦在1999年參與楊德昌導演的《一一》，演出高中生「胖子」一角，青澀的模樣令人印象深刻，2005年迄今，參與超過70個國內外電影、廣告案；隋玲是電子後搖樂團「輕晨電」的主唱，也是伊林模特兒，《媿》是她的電影處女作；汪琴是中國電視劇、電影演員，表演十分內斂精準。

謝承均不想渣下去 生日許願能買房

台劇男神謝承均本週五(4/6)過生日，昨同事提前為他開心過「18歲生日」，工作人員特別準備蛋糕，本來想騙他臨時有通告要來公司，殊不知謝承均太難騙了，逼得工作人員只好說出：「其實是要幫你慶生啦！」

說到今年的生日願望，謝承均表示，最開心的就是跟三立電視續約3年，而最近他在三立台劇《金家好媳婦》中飾演的高冠達是位花花公子，讓網友氣得牙癢癢，直罵「好渣」，也讓謝承均跟編劇許願：希望高冠達不要再那麼渣了。

被正經問起今年的生日願望，謝承均表示去年誠心許下買房子的願望，今年會

更努力完成這個目標。而印象最深刻的慶生方式，他說前幾年，工作人員特地找來粉絲一起慶生，還有鋪紅毯，粉絲甚至都拿著一束花送他，讓他走兩步就哭了。

今年則是由一群女同事幫謝承均慶生，讓他瞬間成萬人迷，笑說自己好像師奶殺手；而工作人員為製造驚喜，一開始並沒端上生日蛋糕，讓正在受訪的謝承均有些許失望，心裡還OS「怎麼只唱歌，沒有蛋糕」，沒想到結束訪問後，生日蛋糕就奉上，讓他又驚又喜，笑說還好剛剛沒說出抱怨的話。

承均因演出三立台劇《金家好媳婦》的高冠達，大展撩妹功力，花花公子的

他在戲裡傷透會莞婷的心，惹來網友罵聲連連，更因劇中形象而被稱「渣達(打)銀行」，聽到這個稱號，謝承均笑說網友真的太有創意了；他還分享因之前韓瑜(飾陳芷琳)失蹤，網友都猜說到底是誰會救韓瑜，沒想到大家竟說「如果芷琳被高冠達殺了的話，那芷琳還是失蹤好了」，讓他哭笑不得。

第一次演花花公子的角色，引起熱烈討論，尤其是先前的火災戲，劇中高冠達救陳芷琳，不顧金產均，讓網友大罵說怎麼可以見色忘友，謝承均大力澄清：「我真的沒有不救兄弟，只是黃少祺真的太壯了，要我怎麼一次救兩個人。」笑翻所有人。

「2018 台灣國際兒童影展」 得獎名單公佈！ 《小樹歪歪》奪「台灣獎」

「2018 台灣國際兒童影展」昨(4)日舉辦「影人之夜」並公布國際競賽的得獎名單，奪得「台灣獎」的動畫片《小樹歪歪》導演郭浚明表示，希望自己的作品能讓更多家庭，接受孩子有不同的發展，如同影片主角一樣，走出自己的路。

「2018 台灣國際兒童影展」由公共電視、富邦文教基金會以及台北市政府、台北市文化局、財團法人台北市文化基金會及台北市電影委員會等共同舉辦。至今已邁入第8屆，本屆成功開啓與「德國慕尼黑國際兒童雙年展」之間的友誼合作。公視董事長陳郁秀昨晚致詞時表示，期許台灣的得獎影片能納入教育體系，供孩子學習。北市文化基金會董事長小野則呼籲，應替兒童影展成立一個像是金馬獎一樣的基金會，「讓更多小朋友看到這些好電影，台灣國際兒童影展值得推廣到全台灣。」

本屆「台灣獎」得主《小樹歪歪》的導

演郭浚明受訪時表示，這部作品投射了自身進入動畫產業35年來的從業紀錄。他並期許，透過自己的作品，能讓更多家庭，接受孩子有不同的發展，如同影片主角一樣，走出自己的路。

在其他國際競賽項目部分，反思環境保育和經濟發展之間權衡的《魚仔保衛戰》拿下「最佳劇情長片獎」；「最佳劇情短片」得主《無聲合唱團》則探討權威、體制與兒童的關係，發人省思；而奪得「最佳動畫長片獎」的《芭蕾奇緣》同樣受到觀眾喜愛，也是本屆的「觀眾票選獎」；《當小紅帽遇上白雪公主》巧妙融合並顛覆著名童話故事，獲頒「最佳動畫短片」；另外，《彈丸兄弟大冒險》呈現出創造力啟發、科學知識教育及娛樂性受評審肯定，成為「最佳電視網路節目」；至於「評審團特別獎」則頒給了聲音設計具有巧思及創意的《勇敢的吹笛手》。

香港文匯報訊 郭富城於前年8月演出了15場口碑超好的舞林密碼演唱會，獲得一致好評。原本完成香港站之後，城城想立即展開去各地的世界巡迴，但是基於他手上有三套電影已答應演出，因而把巡演計劃暫緩一下。近日城城決定完成上半年的電影拍攝後，全力投入其巡演的排練，日前舉行發佈會，宣佈演出100場，更會將原裝智能舞台運送去世界不同城市的場館，令所有歌迷都能看到原汁原味的表演。

■心情大好的城城，指好開心將可和世界各地歌迷見面。

■城城日前聯同其演唱會的製作團隊出席啓動禮。

啓動巡演 宣佈演出100場

城城將智能舞台帶去全球

郭富城2016年8月演出了15場舞林密碼演唱會，特別是其首創的智能舞台，極具震撼，加上城城的勁歌熱舞，把舞台駕馭得出神入化，獲得一致好評。不過，基於城城手上有三套電影已答應演出，因而把巡演計劃暫緩一下。到了2018年，實在經不起世界各地的主辦商的強烈要求，城城決定完成上半年的電影拍攝後，全力投入其世界巡迴演出的排練，務求以最好狀態去會歌迷。

城城日前聯同演唱會的精銳製作團隊，包括製作總監小美、舞台設計Fion、舞蹈總監Sunny Wong、視覺特效總監John Wong、監製Jack Lam等，一起出席世界巡迴演唱會的啟動禮，並公佈演出100場，演出城市包括內地各大城市、澳門、日本、台灣、新加坡、泰國、越南、韓國、倫敦、米蘭、加拿大等地，城城表示：“我是很開心做世界巡迴，

可以與世界各地不同歌迷見面，但是我希望完成上述站點後，再回香港演出。”

形容演唱會團隊是瘋子

問到2018年版本會否有新元素？席上城城形容其演唱會團隊是製作界的瘋子，很多瘋狂和天馬行空的構思，不斷發生，所以會和這個精英團隊為世界巡迴加添新意。還有更開心的是，今次主辦單位決定把城城的智能舞台，原裝運送去世界不同城市的場館，令所有歌迷都能看到原汁原味的智能舞台！城城表示，因為製作繁複，這也是一項超級大工程，他個人相當興奮。

發佈會上播出城城近十年的“舞林”系列演唱會精華片段，現場過百傳媒及主辦單位，均讚不絕口，認為城城的演唱會已經超越國際水平，令人期待。主持黃子佼也強調，如果一個人一生只看一個演唱會，必須是看郭富城的，全場報以熱烈掌

聲。當日，主辦商更送上足金金馬予城城，寓意城城和世界巡迴演唱會團隊，猶如萬馬奔騰，一起打造最勁的演出，奔向全球。而城城亦大晒其獎項，展現一段舞蹈表演。

■城城宣佈世界巡演做足100場！

■城城獲贈足金金馬，寓意他和其團隊猶如萬馬奔騰。

賀老爺成首位百場頭馬馬主 李嘉欣爆家中添新成員

■許世勳成為歷來首位在港取得100場頭馬的本地馬主。

香港文匯報訊 李嘉欣 (Michele) 今年第五年擔任“愛彼女皇盃大使”。早前，Michele特地展示了全球發行僅200枚的“皇家橡樹離岸型系列2018女皇盃限量版自動上鍊計時碼錶”，並拍攝全新宣傳照片。

再度擔任活動大使的Michele表示，很榮幸能夠第五年擔任“愛彼女皇盃大使”。Michele展示了“皇家橡樹離岸型系列2018女皇盃限量版自動上鍊計時碼錶”，在鏡頭前後展現出剛柔大方的時尚魅力。今年是第20屆《愛彼女皇盃》的重要里程碑，20這個數字對Michele來說有着一份特殊意義。“我的生日日期是20號，回想起自己20歲那年剛剛入行開始拍電影，那是一個踏入成熟卻又代表新開始的

歲數，當時覺得成為演員很好玩，感覺很新鮮及很好奇，並對電影工作充滿憧憬！20是我的幸運數字，相信一定可以為《愛彼女皇盃》的參賽馬匹帶來幸運！”

愛一家大小探愛駒

Michele與家人都是馬主，而她名下的馬匹都以“寶”字命名。她分享道：“最新的一匹叫“陸寶”，都是沿用之前一系列的馬名，馬匹們是我們的寶貝，而兒子Jayden就是家中的三寶！平日如有空餘時間，我們都喜歡到馬房探望愛駒，大人小孩一同餵飼紅蘿蔔，享受跟牠們接觸的美妙時光！”

此外，Michele丈夫許晉亨的許氏家族與馬

匹的淵源也甚深。

她說：“老爺(許世勳)於1957年憑‘誘惑’贏得他作為馬主後的首場頭馬，今年1月10日‘獻感’勝出跑馬地賽事，令他成為歷來首位在港取得100場頭馬的本地馬主，這個喜訊讓我們一家人都非常興奮及開心！希望未來可以勝出更多的頭馬，創造更加好的成績！”

談及近況，家中因為多了兩位新成員而變得熱鬧起來的Michele透露：“我們一家人都很喜歡動物，所以再次飼養了一隻貓和一隻狗。初時牠們合不來，但經過一陣子的磨合之後，雖然彼此的性格大不同，卻成了好友！有時候，狗兒去了街散步，小貓會顯得悶悶不樂，應該是因為掛住牠的緣故。”

跟30年老友曾華倩話當年 蘇志威揭晚晚通頂玩到瘋

香港文匯報訊 (記者 李思穎) 蘇志威4日為曾華倩主持節目《今晚見》擔任嘉賓錄影。兩人原來是識於微時的好朋友，蘇老闆現身也為支持好友，兩人聚頭便話當年，暢談年輕時跟梅艷芳、劉嘉玲一班人玩到癲的日子。

正巧當日是兒童節，華倩特地炮製果凍給大家享用，蘇老闆表示跟華倩相識逾30年，為了支持華倩不介意在節目談“女人經”，說到兩人如何認識，蘇老闆笑說：“當年同華倩、阿梅(梅艷芳)、劉嘉玲、藍潔瑛日日都見，晚晚通頂，無所不玩，最癲試過玩啤牌七級豬，輸家被畫大花臉落樓下便利店買東西，由阿梅的廣播道住所玩到壽山村。”華倩表示由小朋友看到他變蘇老闆，不過華倩無意與蘇老闆一起做馬主，笑言對方家底厚，不用合資都頂得住。

生意，稍後再開第三間分店，預計投資7位數字，“幸而禮服店的生意不錯，之前參與婚紗展更有助生意額，(會否讓兩個女兒繼承你生意?) 沒想過，兩個女不適合做生意和娛樂圈，她們有自己出路，大女兒最愛入行，今年10月便出國學廚藝，小女兒好愛美，想做時裝設計，我有時出街都會問她襯衫意見，她會批評我，不過過言無忌，有話可談最重要。”

朱慧敏大讚華倩親手整果凍好sweet，令她勾起不少童年回憶，而她也懂得做一些簡易甜品，好似焗蛋糕、番薯糖水，又知慳儉儉，自誇絕對娶得過。

樂瞳透露今年無意再出寫真，笑言會游說華倩拍寫真，令大家眼前一亮。說到她離開無線後，工作運不錯，並開心透露終於賺夠錢，有能力請全家去旅行。

粉絲熱情超乎想像 周興哲望多到港

香港文匯報訊 (記者 梁靜儀) 台灣創作歌手周興哲 (Eric)，5日到觀塘出席簽唱會，首次在港舉行簽唱會的他，吸引逾三百粉絲到場支持，大受歡迎。

會上Eric跟粉絲玩遊戲及合照外，又獻唱五首歌曲，其間不停送上飛吻及心形，更多次走到台下跟粉絲握手作近距離接觸，並

跟坐輪椅的粉絲自拍，表現親民。他又用廣東話問粉絲：“大家好，我係周興哲，你你喜歡我嗎？”粉絲即齊聲回應：“喜歡。”之後他又宣佈將於七月到港舉行音樂會。

Eric接受訪問時表示，七月在港的個唱仍未定時間及地點，但希望在室內舉行，而這是巡迴音樂會，去年已開始在台北舉行，

之後會在新加坡、馬來西亞、澳門，再到香港。首次來香港舉行簽唱會，Eric指歌迷的反應超乎想像，覺得粉絲很熱情，剛才只有那麼多粉絲跟他大合唱，令他很感動和開心，非常愛香港。問到他可喜歡香港女生？他笑謂以為為香港女生蠻害羞，但原來不是，不過簽會打扮及很可愛。

自主修復胰島功能 雙向調節血糖水平

1) 修復期 渾身乏力、失眠等症狀明顯減輕或消失, 體力精力逐漸恢復, 血糖平穩下降; 懶言倦怠、胸悶心慌、視物不清、手足麻木等症狀明顯好轉。
2) 治療期 并發癥明顯減輕, 空腹、餐後2小時血糖、24小時尿糖值正常; 活性胰島素分泌逐漸正常化, 機體糖代謝紊亂開始被糾正; 血糖保持平穩。
3) 強化期 并發癥癥狀基本減輕或消失, 視力恢復正常, 精力充沛; 受損胰島細胞全面修復, 胰島素分泌完全滿足機體需要; 并發癥好轉。
4) 鞏固期 患者自身血糖、尿糖值達到正常狀態, 并發癥得到控制, 胰島功能正常化, 內分泌系統完全恢復。

顯著降低高血糖, 具有自主調節血糖含量作用
提高胰島素的水平, 增強胰島素自主調節功能
改善胰島素抵抗, 增強機體對葡萄糖的耐受力
降低血清總膽固醇和甘油三脂, 提高免疫系統
強效抑制血小板凝集活性, 并降低血液粘稠度
雙向調節人體血糖, 降低高血糖, 避免低血糖

糖尿病用藥量
*糖尿病普通患者, 在小半杯冷水或溫水中, 每次滴入約30滴, 每日3次, 早中晚餐前空腹服用, 每月3瓶左右。
*糖尿病重癥患者, 每次需滴加40-60滴, 每日3次, 早中晚餐前空腹服用, 每月4-6瓶。
*注意事項: 野花牌綠蜂膠不宜加入熱水、茶水、咖啡中飲用, 否則會破壞綠蜂膠中的有效成分, 大大影響效果。
