Trump says 'unfair' defense treaty with Japan needs to be changed

Japan's Prime Minister Shinzo Abe and U.S. President Donald Trump attend a family photo session in front of Osaka Castle at the G-20 summit, in Osaka, Japan June 28, 2019 Tomohiro Ohsumi/Pool via REUTERS

OSAKA (Reuters) - U.S. President Donald Trump on Saturday said he told Japanese Prime Minister Shinzo Abe that a decades-old security treaty between their countries must be changed, reiterating his criticism of the pact as unfair.

Russia unsure if Japan-U.S. treaty revision will affect islands dispute
Trump said he was not planning to withdraw from the treaty, which the partners have long called a linchpin of Asia-Pacific stability, but that it placed too great a burden on the United States
"I told him, we'll have to change it," Trump told a news conference after a two-day summit of the Group of 20 major economies in Japan's western city of Osaka.

"I said, look, if someone attacks Japan, we go after them and we are in a battle, full force, in effect," he added. "If somebody should attack the United States, they don't have to do that. That's unfair."

The treaty, signed after Japan's surrender in World War Two, commits the United States to defend Japan.

In return, Japan provides military bases that Washington uses to project power deep into Asia, including the biggest concentration of U.S. Marines overseas on Okinawa, and the forward deployment of an aircraft carrier strike group at the Yokosuka naval base near Tokyo.

An end to the security pact is widely seen as raising the risk of forcing Washington to withdraw a major portion of its military forces from Asia at a time when China's military power is growing.

Rep. Ocasio-Cortez returns to bartending to promote fair wages

NEW YORK (Reuters) - U.S. Representative Alexandria Ocasio-Cortez took lunch orders, served pizza and rocked the cocktail shaker on Friday to promote increased wages for restaurant servers and other tipped workers.

The New York Democrat and media sensation, who famously worked as a bartender before getting elected to Congress last year, brought first-hand experience to the debate over the proposed "Raise the Wage Act," which would raise the U.S. minimum wage to \$15 an hour and guarantee that minimum for tipped employees.

U.S. law exempts restaurants, nail salons and car washes from paying their tipped staff the minimum wage of \$7.25 per hour, instead creating a "tip credit" of up to \$5.12 per hour that allows them to pay as little as \$2.13 per hour on the books.

"Any job that pays \$2.13 per hour is not a job, it is indentured servitude," Ocasio-Cortez told restaurant workers, customers and reporters at the Queensboro Restaurant in her New York City district, in a reference to the lowest possible wage before tips.

Ocasio-Cortez, 29, stunned New York Democrats a year ago by defeating incumbent Joe Crowley in the primary election, then cruised to victory in November and soared to national prominence as a leading voice of the left wing of the party.

The National Restaurant Association, the industry lobbying group, has opposed the Raise the Wage Act, saying it would harm restaurants that typically rely on margins between 3% and 6%, and that the tip credit allows tipped employees to earn far more than the minimum wage.

Supporters of Raise the Wage Act argue that restaurants are doing just fine in the seven states that mandate tipped employees receive the minimum wage.

Ocasio-Cortez said she worked as a restaurant hostess starting at age 16 and later as part of the wait staff, where she was forced to endure sexual harassment, such as inappropriate comments or touching from customers.

Restaurant servers, who are mostly women, are more able to stand up to abusive customers early in the month when they can "tell that guy to buzz off," but are prone to giving in when the rent is due, Ocasio-Cortez said.

Rep. Alexandria Ocasio-Cortez (D-NY) serves drinks in support of One Fair Wage at The Queensboro restaurant in the Queens borough of New York

Rep. Alexandria Ocasio-Cortez (D-NY) makes a drink in support of One Fair Wage, a policy that would allow tipped workers to receive full minimum wage plus their tips in New York, at The Queensboro restaurant in the Queens borough of New York, U.S., May

The Number of Overweight People In The U.S. Has Increased Significantly in Recent Years

Obesity Greatly Increases Risk Of Serious Disease And Early Death, Warn Researchers

Being obese is linked to a significantly higher chance of serious disease and early death than being a healthy weight, research on more than 2.8 million adults suggests.

The chance of suffering serious illness goes up with increasing weight gain, experts analysing health, death and sickness data from UK adults found.

How much does the risk increase as your BMI rises?

Presented at the European Congress on Obesity (ECO) in Glasgow, the study found that people with a body mass index (BMI) of 30 to 35 were at 70% higher risk of developing heart failure than their healthy weight peers.

Even a BMI of 25 to 30 increased the risk by 20%, while a BMI of 35 to 40 more than doubled the risk and a BMI of 40 to 45 almost quadrupled the risk compared to people of a normal weight.

The study also found that compared with normal weight individuals, a BMI of 25 to 30 increased the risk of Type 2 diabetes and sleep apnoea by more than double, while a person with a BMI of 30 to 35 was more than five times as likely to develop Type 2 diabetes and almost six times as likely to develop sleep apnoea.

For those with a BMI of 35 to 40, the risk of Type 2 diabetes was almost nine times higher, and 12 times higher for sleep apnoea.

More than 65% of Americans are overweight to obese.

People with severe obesity (BMI of 40 to 45) were 12 times more likely to develop Type 2 diabetes and had a risk of sleep apnoea that was 22 times greater.

The results also showed that increasing weight was linked to higher risk of high blood pressure, irregular heartbeat and dyslipidaemia (abnormal levels of cholesterol and other fats in the blood).

The more obese people are, the higher their risk of serious disease, research finds. Credit: PA

Compiled And Edited By John T. Robbins, Southern Daily Editor

To what degree?

People with a BMI of 40 to 45 had triple the risk of heart failure, high blood pressure, and dyslipidaemia.

This BMI was also linked to a 50% higher risk of dying prematurely from any cause compared to people of a normal weight.

The research found that the risk of developing serious health problems was highly dependent on whether or not people already had issues at the start of the study.

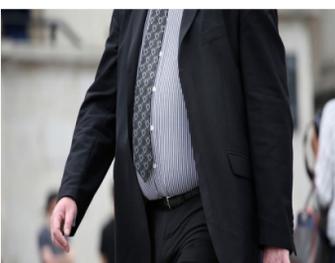

For example, having high blood pressure at the start of the study was strongly associated with developing dyslipidaemia, chronic kidney disease and Type 2 diabetes.

How extensive was the research?

Researchers looked at health, death and BMI data from more than 2.8 million adults between January 2000 and July 2018 from the UK Clinical Practice Research Datalink.

This was linked with hospital data to estimate the risk for serious health problems.

What do the report authors highlight from their work?

Obesity has almost tripled worldwide over the past 30 years. Credit: PA

Author Christiane Haase, from Novo Nordisk in Denmark, which funded the study, said: "The health risks linked with having excess body weight are particularly high for Type 2 diabetes and sleep apnoea.

"With the number of people living with obesity almost tripling worldwide over the past 30 years (105 million people in 1975 to 650 million in 2016), our findings have serious implications for public health."

The research was presented as a poster at the conference and was peer-reviewed by the conference selection committee. Naveed Sattar, professor of metabolic medicine at the University of Glasgow, said: "This study serves to remind us, once again, how damaging obesity is given its strong associations with a range of conditions beyond diabetes and heart disease.

"The obesity links to heart failure are becoming more widely appreciated and links to sleep apnoea, hypertension and abnormal blood fats are well known.

"Like most observational BMI studies using routine health data, there are limitations to this work but I suspect some risks are in fact underestimated.

"The health profession needs to up its game in helping people improve their weight (there are good signs that it is doing so) as it is unlikely that the food environment is going to drastically improve anytime soon."

Who else has reacted to the report findings?

Dr Emily Burns, head of research communications at Diabetes UK, said: "It's important to note the significantly increased risk of Type 2 diabetes suggested by this research – while alarming – was specifically seen in people with a very high BMI of over 40, which only accounts for 2% of men and 5% of women in England.

"That said, we know that being overweight increases your risk of developing Type 2 diabetes.

"Losing weight can be tough, but programmes such as NHS England's Diabetes Prevention Programme are there to help people at high risk, and the Diabetes UK website has ideas for healthy meals, ingredient swaps and tips on getting active too."

Louis Levy, head of nutrition science at Public Health England (PHE), said: "Most countries are facing increasing levels of obesity, putting pressure on both individuals' health and national health and social care systems.

"To reverse what's been decades in the making needs sustained action across the drivers of poor diets and weight gain.

"We're working with industry to make food healthier, we've produced guidance for councils on planning healthier towns and we've delivered campaigns encouraging people to choose healthier food and lead healthier lives." (Courtesy <https://www.itv.com/news>)

Drug Resistance Could Kill 10M People Per Year By 2050, Experts Say

(Illustration/S. Grillo/Axios)

Compiled And Edited By John T. Robbins, Southern Daily Editor

Infectious disease experts agree with a dire scenario painted in the UN report posted earlier this week saying that, if nothing changes, antimicrobial resistance (AMR) could be “catastrophic” in its economic and death toll.

Threat level, per the report: By 2030, up to 24 million people could be forced into extreme poverty and annual economic damage could resemble that from the 2008–2009 global financial crisis, if pathogens continue becoming resistant to medications. **By 2050, AMR could kill 10 million people per year, in its worst-case scenario.**

“There is no time to wait. Unless the world acts urgently, antimicrobial resistance will have disastrous impact within a generation.”

— per the report

What they’re saying: Experts tell Axios action must be taken or the scenario will come true.

“Unfortunately, I think if we don’t do anything differently, the estimates are absolutely realistic. ... Like global warming, the longer we delay action, the worse it’s going to get.”

— Amy Mathers, director, The Sink Lab at the University of Virginia

“If global action fails to stem the tide of AMR, a century of medical advancement will be lost, damage to the environment will be irreparable, more people will fall into extreme poverty, [and] global health security will be imperiled.”

— Tarik Jasarevic, spokesperson, World Health Organization

“We are currently losing the arms race against bacteria! ... Soon routine surgeries and treatments for diseases like cancer ... may become life-threatening and too risky to be implemented because of the probability of bacterial infections.”

— Stéphane Mesnage, lecturer, The University of Sheffield

By the numbers: Currently, at least 700,000 people die each year due to drug-resistant diseases, including 230,000 people from multidrug-resistant tuberculosis, per the UN. Common diseases — like respiratory infections, STDs and urinary tract infections — are increasingly untreatable as the pathogens develop resistance to current medications.

•The Centers for Disease Control and Prevention says AMR causes more than 23,000 deaths and 2 million illnesses in the U.S. annually.

•“In India, the CDC estimates that more than 58,000 babies under the age of 1 die every year of a drug-resistant pathogen,” Mathers points out.

What needs to be done: Jasarevic says the economic and health systems of all nations must be considered, and targets made to increase investment in new medicines, diagnostic tools, vaccines and other interventions.

1. The mindset around current antibiotic usage must be altered.

•“We need to think about antibiotics as a shared and finite resource,” Mathers says. Usage to promote animal growth “must be eliminated” and doctors need to stop prescribing medicines “just in case” their patient needs it.

•Pamela Yeh, assistant professor at UCLA, agrees. “An enormous amount of antibiotics — around [roughly] 80% — used in this country [are] used in industrial agriculture. Not to make sick animals healthy, but to make healthier animals grow a little faster. ... There needs to be political will to stop using our few and precious antibiotics in these situations”.

2. Incentives for companies to develop new antibiotics need to be fostered.

•“We need to think of antibiotics (developing and protecting them) as a public good — much like we invest in things like national parks, public libraries, roads, bridges, traffic lights,” Yeh says.

•Mathers says the traditional drug manufacturing process doesn’t work for public companies because investors prefer drugs that need to be taken regularly rather than ones with sporadic usage. She points to the case of Achaogen, a California biotech company that generated buzz when it won one of the few antibiotic approvals in recent years with Zemdri, but was recently forced to file for bankruptcy.

But: Some progress has been made.

•**Some new antibiotics are proving to be life-saving**, Mathers says, pointing to a new type of combination antibiotics that is “saving lives.”

•**Research continues**, such as this study published today in the journal PLOS Pathogens that says they’ve figured out how the superbug *Enterococcus faecalis* is able to cause disease — it modifies a polysaccharide on its cell surface — although they’re

still trying to figure out why the immune system doesn’t recognize it. But, the discovery of this change “will allow the design of novel drugs targeting this process critical for the infection,” study author Mesnage says.

•**Antibiotic use in animal husbandry** is slowly being tackled, although Mathers says “the reworking, cost and investment that will need to take place to overhaul the food chain is really enormous.” Still, the FDA issued a 5-year plan to promote the proper use of antibiotics, and a group of companies and trade groups representing the entire food chain process recently agreed on a shared stewardship framework. **The bottom line:** Action must be taken to avoid a catastrophic future. (Courtesy axios.com)

Related
Growing antibiotic resistance is dire concern, health experts say

Better screening and increased drug research into new antibiotics and antiviral medications are greatly needed to head off what some health experts say could be a future in which there will be no effective medications to fight common infections like gonorrhea, syphilis, E. coli and staph.

Why it matters: Antimicrobial resistance is currently projected to be the number one killer by 2050 — “outpacing even cancer” — according to Amy Mathers, assistant professor at the University of Virginia School of Medicine.

The specter of increasingly drug-resistant diseases made news this week when CDC officials announced America reached a record high of new cases of sexually transmitted diseases. They also warned of increasing signs that one of the most common STDs, gonorrhea, is becoming more resistant to front-line antibiotics.

The threat: This disease has proven to be a “smart bug,” developing resistance to multiple antibodies in the past, Elizabeth

Torrone, who leads surveillance and special studies for CDC’s Division of STD Prevention, tells Axios.

•If left untreated, gonorrhea can cause infertility, miscarriages, chronic pain and blindness in newborns.

•Currently, there’s one last antibiotic (ceftriaxone) that remains effective against the disease.

•It’s often prescribed as a dual therapy, with a single shot of ceftriaxone plus an oral dose of a second antibiotic (azithromycin), in an attempt to preserve the ceftriaxone’s effectiveness, Torrone says.

•CDC officials warned they recently found an uptick in the portion of lab samples showing resistance to azithromycin — from 1% in 2013 to 4% in 2017.

Despite being a small percentage,

this is a concern because genes from the resistant strains could crossover with gonorrhea genes and reduce its susceptibility to ceftriaxone, Torrone says.

•In addition, 3 severely resistant cases found outside the U.S. this year are causing alarm.

•The WHO, which has a separate program to monitor this problem, continues to report growing resistance to multiple antibiotics in many countries.

What’s needed is both better diagnostic testing and the development of new antibiotics, Mathers says. She says next-generation sequencing is where testing should head, so that physicians know which specific antibiotic is best to prescribe, instead of having the patient take multiple ones. Plus, she adds, this can help track antibiotic resistance more carefully.

This is a complicated problem,” Mathers says. More antibiotic resistance research is needed not only in people, but also the role resistance plays in other areas like animal husbandry and wastewater. (Courtesy axios.com)

《九龙不败》张晋偏执神探对决喋血狂徒

由香港金像奖导演陈果执导，张晋、“蜘蛛人”安达臣施华、郑嘉颖、刘心悠、邓丽欣领衔主演，周国贤、陈钰芸、吴岱融、李丽珍、林雪等壹众实力派演员联袂主演的电影《九龙不败》将于7月2日登陆全国各大院线。片中张晋与“蜘蛛人”安达臣施华拳拳到肉的对决令人肾上腺素飙升，也让该片成为近期最受期待的犯罪动作电影。值得壹提的是，过往影片中张晋多以年代造型亮相展开功夫对决，而此次《九龙不败》中，他制服西装、颓废迷茫、辫子装扮等各种造型壹壹上演，成为壹大看点。

张晋挑战多变造型 探索人物内心演技再获突破

影片中，张晋饰演的警探九龙在案件追踪中，经历了事业与爱情的大起大落，内心世界矛盾而复杂，在不同阶段与心路历程中，九龙的造型迥然不同又看点十足。查案伪装成古惑仔时，眼线搭配小辫的架架装扮下尽显狠绝毒辣；痛失挚爱后，则大腹便便，不修边幅，全然壹副自暴自弃之感；而在真凶肆虐之际，再次挺身而出的九龙重获八块腹肌，自信干练的外表下，是追凶到底的决然。

要将这三种截然不同的心

理状态完美地诠释，除了造型的辅助外，张晋在演技上的突破更为惊艳，对人物内心的挖掘与展现备受陈果导演的盛赞。张晋也坦言为了演好角色自己学习揣摩了很多，导演也给了自己很多的指导与帮助，相信会令观众眼前壹亮。

聚焦女性安全问题 誓与罪犯战斗到底

《九龙不败》讲述了在离奇女警连环凶案发生后，张晋饰演的探长九龙执著追凶，与罪犯对抗到底的故事。聚焦连环杀人案件的犯罪电影并不少见，但像《九龙不败》这样关注到女性安全问题的尚属少数。此前片方特别制作的“女孩别怕”公益视频，壹经曝光便引发了社会各界的广泛关注与讨论。视频聚焦女性受害壹社会话题，通过多维分析犯罪行为，教授女性在遭遇危险时

如何正确应对，令众多女性网友感同身受，直呼此举非常必要。张晋以警探身份提出安全建议也令人倍感安心。

视频在全国各省广泛传播，得到了百余个微博公安号的支持转发，全民协力为创造更善更美的社会环境发声，呼吁社会舆论引导正面的关爱和支持，张晋也在微博上表示“希望我们的社会，有更多人愿意站出来保护女性，给予女性更安全的环境，让女孩不再害怕。”由电影延伸至现实的人文关怀，令网友纷纷力挺要去影院支持《九龙不败》。

电影《九龙不败》由天马影联影视文化（北京）有限公司、博纳影业集团股份有限公司、天马电影出品（香港）有限公司、浙江博纳影视制作有限公司出品，大名娱乐有限公司联合出品，将于7月2日全国上映。

《铁血川军之九条命》承载热血力量

伤亡，其中阵亡 263991 人，负伤 356267 人，失踪 26025 人，其牺牲之惨烈、返乡人数之少，都位居全国前列。

在迈向胜利的道路上，川军之师，居功至伟。历史和人民将牢牢记住他们的光辉事迹，代代传承。由峨眉电影集团有限公司、湖南贵德集团有限公司、四川万泰时代影视文化传媒有限公司、四川领天下酒业有限公司、湖南永州江华神州瑶都旅游开发投资有限公司联合出品的电影《铁血川军之九条命》，正是将镜头对准了抗日战争中的铁血川军，讲述了壹个川军的下层连长和八个普通川军士兵，联合湘南的瑶汉乡亲，以血肉之躯抗击日本侵略者、捍卫民族尊严，守卫家国的故事。

近日，电影《铁血川军之九条命》的概念海报正式发布。海报的主体部分是壹位手持步枪的抗战勇士，身后是燃烧的熊熊烈火，可他的眼神坚毅，面无惧色，视死如归。画面的正下方是硝烟弥漫的隆冬湘南大地，海报要传达出“壹个人的身躯，承载着全川儿女的热血和力量”的顽强精神。

海报以黑红为主色调，黑色代表土地，红色代表鲜血，为了告诉我们今日的胜利来之不易，我们安稳栖息的这片土地，是多少壮士浴血奋战换来的，悲壮至极，可歌可泣。

电影《铁血川军之九条命》预计将于 2019 年下半年登陆全国各大院线。

正所谓“无川不成军”，在中华民族十四年的伟大抗战历程中，共有 350 余万川军出川抗战，约占全国出兵抗战军队总数的 1/5，参军人数居全国之首。至抗战结束，川军队伍有 64 万人

《银河补习班》太空戏幕后特辑

6月24日，电影《银河补习班》路演来到了沈阳站，邓超、俞白眉、白宇、冯泽昂先后走进了沈阳城市建设学院和沈阳大学，与高校师生和当地影迷进行了面对面的交流。片方同时曝光了“演员白宇特辑”，青年演员白宇讲述了自己在电影拍摄过程中的磨练和成长。

在片方曝光的“演员白宇特辑”中，呈现了他在片中大量的“太空戏份”，带来视觉冲击的背后，是白宇要完成的大量模拟失重状态、太空行走等硬核的高难度动作。在影片拍摄的过程中，白宇主动要求提前壹个月就进组接受特训。为了营造逼真的失重效果，他需要被绑上威压，每天在十米以上的高空连续排练十几个小时，结果往往是排练结束后，全身肌肉僵硬，不能

动弹。邓超说：“他眼睛里闪烁的光芒，让人坚信这个演员未来就是会跟别人不壹样。”过程辛苦，但白宇表示：“累并快乐着，穿上宇航服内心无比骄傲，再辛苦也值得。”

24日，白宇现身沈阳路演，在与现场观众的交流中，白宇也谈到了自己的父亲：“我父亲不是马皓文这样

的父亲，他相对比较严肃，虽然表达方式不同，但对孩子的爱是相同的，他永远比我想象的更爱我。”谈到电影时，白宇坦言：“第壹次看片时，我忽然发现它像壹面镜子，让我明白很多时候父母都在默默地保护我，只是我自己没有注意到。”

美南廣播電視台 看電視聽廣播

美南國際電視STV15.3為方便觀眾收看，「電視廣播合為一體」

不需任何付費，觀眾可24小時直接收看及收聽該頻道，行車間也可方便收聽，輕鬆獲取美南電視節目以及各類國際、社區重大資訊。

操作指南如下，讓觀眾24小時收看收聽：

1. 掃二維碼(QR code)：

觀眾只要掃描報上的二維碼，就可連結到美南國際電視，直接在手機上觀看STV15.3。

2. Google搜尋： 觀眾只要在Google網站搜尋「Southern TV - STV15.3 Houston」

STV15.3 Houston

或輸入該平台網址
「<http://media.maqtv.com/?1497381&proc=1>」
就可直接連結美南國際電視直播平台。

<http://media.maqtv.com/?1497381&proc=1>

3. 下載Apps收看：

可在蘋果商店搜尋「Today America」，下載Apps，除了可用手機讀報更方便，也可以在Apps裡收看STV15.3 電視直播。

如需開車時收聽廣播，請鏈接到車載音響設備(數據線/藍牙設備)，效果更佳。

《文華時間》

《新聞面對面》

最專業最即時多元的新聞報導，國際時事、社區動態、生活藝文資訊、氣象和路況報導。

美南新聞聯播，每週一到週五晚6點30 全球直播，掌握世界新聞脈動

美南新聞聯播

美南國際電視15.3日前「電視廣播合為一體」全球直播上線，手機掃描二維碼就可24小時觀看該頻道，獲得廣大迴響；為廣大觀眾，讓新聞播報更即時，美南國際電視STV15.3即將在6月18日全球直播新聞「美南新聞聯播」，新聞播報時間為週一至週五晚6:30-7:30，讓觀眾行車間也可以方便收聽，掌握國際和社區重大新聞資訊。

美南國際電視15.3創下華人媒體創舉，將電視與廣播融為一體，帶給觀眾不同體驗。全球新聞「美南新聞聯播」將採用全新直播陣容，用專業新聞態度為社區觀眾帶來最即時多元的新聞報導。

「美南新聞聯播」囊括國際時事、社區動態、生活藝文資訊三大版塊，播報新聞同時也會穿插氣象和路況報導，觀眾可利用網站搜尋、微信連結或下載Apps方式，行車間連接到車載音響設備(數據機/藍芽設備)，可收看及收聽該頻道。
