## Lebanese protesters storm ministry buildings as anger over Beirut blast grows

Demonstrators run away from tear gas fired by riot police during a protest following Tuesday's blast, in Beirut, Lebanon August 8, 2020. REUTERS/Hannah McKay

BEIRUT (Reuters) - Lebanese protesters stormed government ministries in Beirut and trashed the offices of the Association of Lebanese Banks on Saturday as shots rang out in increasingly angry demonstrations over this week's devastating explosion.

The protesters said their politicians should resign and be punished for negligence they say led to Tuesday's blast, the biggest ever to hit Beirut, that killed 158 people and injured more than 6,000, compounding months of political and economic meltdown.

A policeman was killed during the clashes, a spokesman said. A policeman at the scene said the officer died when he fell into an elevator shaft in a nearby building after being chased by protesters.

The Red Cross said it had treated 117 people for injuries on the scene while another 55 were taken to hospital. Policemen wounded by stones were treated by ambulance workers. A fire broke out in central Martyrs' Square.

Dozens of protesters broke into the foreign ministry where they burnt a portrait of President Michel Aoun, representative for many of a political class that has ruled Lebanon for decades and that they say is to blame for its current mess.

### RELATED COVERAGE

Lebanese PM says only way out of crisis is holding early elections: statement

Factbox: Countries rally round Lebanon after Beirut blast "We are staying here. We call on the Lebanese people to occupy all the ministries," a demonstrator said by megaphone.

About 10,000 people gathered in Martyrs' Square, some throwing stones. Police fired tear gas when some protesters tried to break through the barrier blocking a street leading to parliament, a Reuters journalist said.

Police confirmed shots and rubber bullets had been fired. It was not immediately clear who fired the shots. Riot police shot dozens of teargas canisters at protesters, who hit back with firecrackers and stones.

TV footage showed protesters also breaking into the energy and economy ministries.

They chanted "the people want the fall of the regime", reprising a popular chant from the Arab Spring uprisings of 2011. They held posters saying "Leave, you are all killers".

The U.S. Embassy in Beirut said the U.S. government supported the demonstrators' right to peaceful protest and urged all involved to refrain from violence.

The embassy also said in a tweet that the Lebanese people "deserved leaders who listen to them and change course to respond to popular demands for transparency and accountability".

Prime Minister Hassan Diab said the only way out was early parliamentary elections.

'GO HOME!' The protests were the biggest since October when thousands of people took to the streets in protest against corruption, bad governance and mismanagement.

"You have no conscience, you have no morality. Go home! Leave! Resign, Enough is enough," shouted one of the protesters. "What else do you want? You brought us poverty, death and destruction," said another.

Demonstrators run away from tear gas fired by riot police during a protest following Tuesday's blast, in Beirut, Lebanon August 8, 2020. REUTERS/Hannah McKay Soldiers in vehicles mounted with machine guns patrolled the area. Ambulances rushed to the scene.

"Really the army is here? Are you here to shoot us? Join us and we can fight the government together," a woman yelled.

Tuesday's blast was the biggest in Beirut's history. Twenty-one people were still reported as missing from the explosion, which gutted entire neighbourhoods.

The government has promised to hold those responsible to account. But few Lebanese are convinced. Some set up nooses on wooden frames as a symbolic warning to Lebanese leaders.

"Resign or hang," said one banner at the demonstration.

The prime minister and presidency have said 2,750 tonnes of highly explosive ammonium nitrate, which is used in making fertilisers and bombs, had been stored for six years without safety measures at the port warehouse.

### ECONOMIC MELTDOWN

The explosion hit a city still scarred by civil war and reeling from an economic meltdown and a surge in coronavirus infections.

For many, it was a dreadful reminder of the 1975-1990 civil war that tore the nation apart and destroyed swathes of Beirut, much of which had since been rebuilt.

# Huawei to stop making flagship chipsets as U.S. pressure bites, Chinese media say

SHANGHAI/SHENZHEN, China (Reuters) - Huawei Technologies Co [HWT.UL] will stop making its flagship Kirin chipsets next month, financial magazine Caixin said on Saturday, as the impact of U.S. pressure on the Chinese tech giant grows.

U.S. pressure on Huawei's suppliers has made it impossible for the company's HiSilicon chip division to keep making the chipsets, key components for mobile phone, Richard Yu, CEO of Huawei's Consumer Business Unit was quoted as saying at the launch of the company's new Mate 40 handset.

With U.S.-China relations at their worst in decades, Washington is pressing governments around to world to squeeze Huawei out, arguing it would hand over data to the Chinese government for spying. Huawei denies it spies for China.

The United States is also seeking the extradition from Canada of Huawei's chief financial officer, Meng Wanzhou, on charges of bank fraud.

In May the U.S. Commerce Department issued orders that required suppliers of software and manufacturing equipment to refrain from doing business with Huawei without first obtaining a license.

"From Sept. 15 onward, our flagship Kirin processors cannot be produced," Yu said, according to Caixin. "Our

AI-powered chips also cannot be processed. This is a huge loss for us."

Huawei's HiSilicon division relies on software from U.S. companies such as Cadence Design Systems Inc or Synopsys Inc to design its chips and it outsources the production to Taiwan Semiconductor Manufacturing Co (TSMC), which uses equipment from U.S. companies.

Huawei declined comment on the Caixin report. TSMC, Cadence and Synopsys did not immediately respond to email requests for comment.

HiSilicon produces a wide range of chips including its line of Kirin processors, which power only Huawei smartphones and are the only Chinese processors that can rival those from Qualcomm in

quality.

"Huawei began exploring the chip sector over 10 years ago, starting from hugely lagging behind, to slightly lagging behind, to catching up, and then to a leader," Yu was quoted as saying. "We invested massive resources for R&D, and went through a difficult process."

### CDC Blames Travel From 3 Countries For COVID-19 Spreading Around The World

Photo by Fusion Medical Animation via Unsplash

Compiled And Edited By John T. Robbins, Southern Daily Editor

ATLANTA, Ga. — To date, there are more than 18 million confirmed cases of COVID-19 around the world. The virus has spread to every corner of the globe throughout 2020 and tragically caused nearly 700,000 deaths. So how did things get so bad? A new study finds the first cases in at least two-thirds of infected nations are linked to travel involving China, Italy, and Iran. The U.S. Centers for Disease Control and Prevention says an examination of COVID-19 records during the first 11 weeks of the outbreak reveals a strong connection to the pandemic spreading out of these countries. From Dec. 31, 2019 to March 10, 2020, the first case of coronavirus in 75 of 99 affected nations (outside of China) involves a person traveling to an area where the virus was already spreading.

People in China wear masks against COVID-19.

Of those cases, 27 percent of first infections involve a person traveling to Italy. Another 22 percent start with people visiting China, and 11 percent of nations were affected by contact with Iran.

"Our findings suggest that travel from just a few countries with substantial SARS-CoV-2 transmission may have seeded additional outbreaks around the world," says the CDC's Dr. Fatimah Dawood in a media release.

#### Travel's devastating role in the pandemic

The CDC says this is the first study looking at how international travel spread COVID-19 before the outbreak was officially declared a pandemic. Over 32,000 cases in 99 countries outside of mainland China were recorded during the first 11 weeks of 2020.

Travel to Italy in particular had a devastating impact on several continents and the countries within. Three of the six first cases in Africa have ties to Italy. Over a third — 16 of 45 nations — in Europe and nearly 40 percent of countries in the Americas link initial infections to Italy.

Worker sprays disinfectant on outside plaza in Italy.

Exposures linked to mainland China account for nearly all of the first cases in the Western Pacific — 10 out of 12 countries. The Chinese city of Wuhan is suspected of being the origin point for SARS-CoV-2, the virus which causes COVID-19.

The scientists also link 44 percent of first cases in the Eastern Mediterranean to travel to and from Iran.

#### Where did people spread COVID-19?

The CDC team says they have in-depth data on 1,200 of the initial coronavirus cases from 68 different countries. From that information, they are creating a picture of how and where the virus was spread in January, February, and March. Among these early cases, the average age of a COVID-19 patient is 51. Just three percent are younger than 18 years-old and only two percent of the patients are healthcare workers.

During this pre-pandemic period, the CDC study shows the virus was most commonly passed on to others inside a household. These transmissions get an average of 2.6 people sick. The report also reveals faith-based groups and dinner parties played the biggest role in widespread transmission of COVID-19. An average of over 14 people were diagnosed with coronavirus after attending one of these gatherings.

"Four large clusters in our analysis, and large outbreaks reported elsewhere, have been linked with transmission in faith-based settings, highlighting the need to partner with faith-based organizations when designing and implementing community mitigation efforts," says co-author Dr. Philip Ricks.

Dr. Ricks also points to several infection clusters in medical facilities, underscoring the need for better infection prevention practices inside hospitals.

Iranians walk public street with banners warning of COVID-19.

#### The picture remains incomplete

The CDC says their report doesn't paint the entire picture of the pandemic because of limited data from low-income countries in and around Africa had reported COVID-19 cases by the time the World Health Organization declared COVID-19 a pandemic.

"Accurate data from these settings will be needed to assess the full global effect of the COVID-19 pandemic," Dawood explains.

The study appears in The Lancet Infectious Diseases journal. (Courtesy <https://www.studyfinds.org/>)

#### Religious Groups Received \$6-10 Billion In COVID-19 Relief Funds, Hope For More

Churches in the U.S. received billions of dollars as part of the Paycheck Protection Program. New coronavirus relief legislation would likely include additional money available to houses of worship. (Photo/Morry Gash/AP) Religious organizations, having received as much as \$10 billion in the first round

of COVID-19 aid, hope to receive more funding under any new relief package. Churches of all denominations and other religious nonprofits were quick to take advantage of the Paycheck Protection Program, which provided forgivable loans under the CARES Act in March. The U.S. Catholic Church alone received at least \$1.4 billion in funding and possibly as much as \$3.5 billion under the program, according to an analysis by the Associated Press, using data provided by the Small Business Administration (SBA).

Mainline Protestant and evangelical churches also benefited. An analysis by Ministry Watch, an organization that provides guidance on charitable giving, reported this month that churches and other religious non-profits as a whole received between \$6 and \$10 billion in PPP funding.

In a new report released this week, Ministry Watch identified more than 400 evangelical ministries and churches that each received at least \$1 million in COVID-19 aid, with seven institutions receiving PPP loans of \$5-10 million. Among those receiving multi-million dollar forgivable loans were some of the best known evangelical churches in the country, including the First Baptist Church of Dallas and Redeemer Presbyterian Church in New York City. Willow Creek Community Church in Barrington, Illinois, received \$5-10 million in relief aid, as did the headquarters of the Evangelical Lutheran Church in America (ELCA).

Although Democrats and Republicans remain far apart in their negotiations over a new round of COVID-19 relief funding, both parties' proposals include new PPP funding, with religious nonprofits still able to participate. (Courtesy npr.org)

NYC Setting Up Quarantine Checkpoints For Travelers From COVID-19 Hot Spots

Traffic makes its way into Manhattan over the Williamsburg Bridge in March 2019. New checkpoints at New York City's major bridges, tunnels and other sites are meant to drive home the message that 14-day quarantine rules are mandatory for people returning from states considered coronavirus hot spots. Mary Altaffer/AP

Compiled And Edited By John T. Robbins, Southern Daily Editor

New York City Mayor Bill de Blasio announced last Wednesday that for the first time law enforcement units will establish COVID-19 quarantine checkpoints.

"We will have checkpoints at key entry points to the city," de Blasio said at his daily briefing.

The goal is to track travelers and city residents returning home from more than 30 states now designated by New York state as coronavirus hot spots. Those people will be required to complete travel health forms to support contact-tracing efforts.

"Travelers coming in from those states will be given information about the quarantine, reminded that it is required and not optional," de Blasio said, adding that stiff fines can be levied against those who flout public health rules.

The checkpoints will be operated by various law enforcement agencies, with the New York City Sheriff's Office coordinating the effort "at major bridge and tunnel crossings."

Tracking The Pandemic: States Where The Coronavirus Cases Are Rising Or Falling

"We need to ensure visitors and New Yorkers returning home are taking the necessary precautions," Sheriff Joseph Fucito said. "We're going to deploy to be very visible."

Travelers from most of the U.S. are affected by the state rules requiring 14-day quarantines. While enforcement has increased, public health officials

acknowledge compliance largely relies on public cooperation. "Having people see that these checkpoints are starting to happen around the city is going to send a powerful message," de Blasio said.

City officials said they're offering travelers help and support — including food and medication delivery — while they're in quarantine.

This week, New York state officials added Rhode Island to the list of "hot spot" states where infection rates are high enough to trigger the travel restrictions.

Delaware and Washington, D.C., were removed from the list.

New York City was once the epicenter of the nation's COVID-19 outbreak, but infection rates have plummeted, hovering now around 1% of the people tested. Local and state officials said they're eager to avoid a second wave. (Courtesy npr.org)

Related After 'Severe' Delays, 6 States Band Together To Buy Coronavirus Tests

Six states have an agreement to acquire fast-result antigen tests for the coronavirus. Here, a medical worker collects a sample after a patient self-administers a nasal swab test. (Graphic/John Minchillo/AP)

Six states led by a bipartisan group of governors are joining together in an effort to speed up coronavirus testing. As the nation's death count continues to rise above 150,000, the states said they will jointly purchase 3 million rapid antigen tests that can quickly detect the virus.

Maryland Gov. Larry Hogan, the outgoing chair of the National Governors Association, said in a statement the multistate compact will address "severe testing shortages and delays" that have hamstrung the nation's response to the

virus. In addition to Maryland, the group includes Virginia, Louisiana, Michigan, Ohio and Massachusetts.

Hogan, a Republican, has been critical of President Trump's response to the pandemic. In a recent op-ed in The Washington Post, Hogan described watching in frustration as the president "bungled" the national response to the spread of the virus.

"Eventually, it was clear that waiting around for the president to run the nation's response was hopeless; if we delayed any longer, we'd be condemning more of our citizens to suffering and death," Hogan wrote. "So every governor went their own way, which is how the United States ended up with such a patchwork response."

'A Wake-Up Call': States Battle New Surge In Coronavirus Cases

Under an agreement signed by the state's governors — three Republicans and three Democrats — each state will receive 500,000 tests that can detect the virus in 15 to 20 minutes.

While new antigen tests work quickly, as NPR's Rob Stein has reported, there are questions about their accuracy in comparison with the more complicated genetic tests that many patients are receiving.

The governors' memorandum said the group intends to "benefit as many interested states as possible." Other state and local governments may also join the effort to buy rapid tests in the coming weeks.

According to a statement from Hogan's office, the program is intended to demonstrate to private manufacturers that there is "significant demand" to scale up production of rapid tests. The states are working with two manufacturers of tests authorized by the Food and Drug Administration. (Courtesy npr.org)

美国家长对孩子要求“低”不“低”？

(本文转自网络)那天姐姐跟我抱怨她儿子：“我对他的要求已经低得不能再低了，他怎么还做不到呢？”我问姐姐：“你对他有什么要求啊？”她说：“没什么啊，就是按时完成作业，每天再加15分钟的课外训练题，考试不要低于80分，语文、数学、外语不要低于85分，一个星期练三次钢琴，奥数班不要落到后10名……”

我赶紧打断她：“你这样要求还低啊，我听著都累。”她睁大眼睛看著我：“这些可都是家长对孩子的最基本要求，我挣扎了很久才做出让步的，别的孩子可没这么轻松！”

最基本的要求？为什么就不能是“孩子你自己开心就好”，“你能独立完成任务就好”，“你只要不对我撒谎，犯错也没关系”或者是“只要你触犯法律和道德规范，干什么都可以”呢？我曾看到一位美国妈妈拿著儿子的成绩单仔细观察后惊喜地大叫：“儿子，你上次美术课没及格，这次及格了耶，真是值得庆祝！”

有人说，美国家长对孩子是放养的态度，其实他们并不是对孩子没有要求，只是，他们奉行的是“低级”要求准则。他们把自己的期望值放在底线上，只要底线以上的都是惊喜，都是加分，这样，父母快乐，孩子也开心，也没看到哪个孩子长大后不学无术，落后于社会，倒是很多孩子越来越优秀，越来越自信，最后前途都很不错。 疯吧闹吧不要紧

第一次见到杰瑞是在公园，我和他妈妈戴安娜站著聊天。那天湖里的水漫上了岸堤，我看4岁的杰瑞在岸边用脚踩水，觉得很担心。戴安娜却耸耸肩说：“没事，让他玩。”突然，

杰瑞脚下一滑，坐在了水里，我大叫一声：“天哪！”戴安娜却只瞥了一眼，继续和我聊刚才的话题。

过了一会，裤子几乎全湿的杰瑞爬起来到草地上和一个六七岁的男孩玩球，玩著玩著两人打起来了，那个孩子力气大，把杰瑞按在了地上。我想过去把他们拉开，戴安娜却拦住我说：“别管他，你说上次那张CD……”

不一会儿，男孩跑了，杰瑞从地上爬起来，走过来对戴安娜说：“妈妈，我鼻子流血了。”戴安娜拿出纸巾给他擦了擦，说：“去吧，玩得开心点。”杰瑞便欢天喜地地去逗小狗了。

我问她为啥对孩子不闻不问，她说：“随他玩吧，只要他别玩出人命，开心就好了，这不算什么。”她告诉我，上个月杰瑞去参加了5岁以上孩子的攀岩比赛，摔得浑身青一块紫一块的，但是居然不是最后一名，得了个安慰奖杯，他高兴坏了。

还有一次，杰瑞和邻居家的孩子一起玩滑板，他根本就不会，把小手指摔骨折了，治疗了三个月才好，杰瑞从此自己就很小心，轻易不再玩自己不熟悉的东西。戴安娜说，这比我天天跟在后面唠叨要强，不让他这样，不让他那样，他就不去做了吗？他会偷偷去玩的，那样更危险。

爬树比数学重要 老外的数学都很差，我有一次给工程师尼克做翻译，翻好了之后发现他连“10.5-0.3=?”这样的算术都要拿计算器来算。我觉得太荒谬了，当场给他表演手动开根号，尼克看得目瞪口呆。我倒是困惑了，咱们中国的小朋友奥数要拿优才能考上好中学，他数学这么差怎么当上工程师的？

尼克耸耸肩说：“在我们那儿，数学好不好不重要，重要的是你有一门好就行了。”我问他：“那你哪一门好啊？”尼克哈哈大笑：“我小时候，数学、语文、自然课全都不及格，但是我爬树和手工课都是优。后来有了计算机课，我总体刚好及格，但是我模型设计那一门得了满分，这样的人不当工程师当什么呢？”

我奇怪了：“你小时候这么多门课不及格，你父母不生气吗？”尼克很诧异地看着我一眼：“我刚才说了，我还有很多门课是优啊，我父母为什么要生气？他们很高兴我能拿优。”

对他们来说，数学零蛋不要紧，只要有一门课是优就行，表明你懂得在感兴趣的科目上下工夫，有学习的能力——在他们看来，数学和音乐、体育课没什么差别。”尼克说，当时为了表扬他得了优，爸爸还特意请他去玩滑水。

在尼克的记忆里，自己是个“手工、爬树、模型设计全优的学生”，“数学不及格”这条信息，根本就不在他的脑子里。他专注于自己的强项，顺利地走上了适合自己的岗位。随你干什么都行 约塞夫是深圳某大学的一名普通外教，月薪13000元。其实他是纽约城市大学法律系的高才生，他的同学们如今有的是律政界新秀，有的已经被列为准合夥人，但是他却自认为比他们过得逍遥自在，不用每天跟陀螺一样拼命工作。他还说，能这么开心，跟他爸爸的“低级”要求大有关系。

上高二的时候，约塞夫突然不想上学了，跟他爸爸说：“我要退学去流浪。”爸爸想了一下，说了一句：“随你干什么都行。”但是流浪也是需要一些钱的，约塞夫要动用自己的大学基金。爸爸说：“好吧，但是你只能拿三分之一，以后赚钱补进去就行了。”

就这样，约塞夫拿著上大学的钱流浪去了。一年以后，他背著破包回来了。家里没人问他准备干什么，朋友都以为他要找个工作。但是几乎游遍世界的约塞夫发现知识很重要，想上大学。他问爸爸：“我学什么专业好呢？”爸爸说：“随你学什么都行。”

约塞夫那会儿觉得哲学家很有派头，就选择了哲学系。上了一年半，他发现没学到什么有用的东西，跟爸爸说：“我不想读哲学了，我要转专业，你说怎么样？”爸爸还是那句话：“随你干什么都行。”

就这样，约塞夫选择了法律系，终于觉得对了路，学起来也相当顺心，毕业的时候成绩全优。爸爸妈妈在毕业典礼上笑得满脸开花：“儿子长大了，真开心！”完全不过问他以后准备做什么。

约塞夫决定来中国，做一名教师，爸爸还是那句话：“随你干什么都行。”

圣诞节的时候，约塞夫收到爸爸妈妈的明信片，上面写道：“亲爱的，希望你开心，不要吃得太多，也不要吃太少。”你可能会觉得一句“随你干什么都行”让教育变得太轻松，太放纵，其实仔细想想，这才是最难做到的，做父母的要克制住多少控制欲、焦虑、担忧和自己的意愿才能做得到！如果有一天你对孩子的要求也低到只有一句“不要吃太多，也不要吃太少”，你就是让孩子真正为自己做了主，这才是教育的最高境界。
