## Harvey Weinstein sues The Weinstein Co for company records

Tom Hals

WILMINGTON, Del. (Reuters) - The Weinstein Co film company on Thursday was sued by its founder and former co-chairman Harvey Weinstein who is seeking information that could help defend himself against sexual assault allegations, and also help defend the company against potential liability. Representatives for Weinstein and The Weinstein Co did not immediately respond to requests for comment. The Weinstein Co has been one of Hollywood’s most influential forces since its launch in October 2005 and has produced and distributed films including “The King’s Speech” and “Silver Linings Playbook.” The New York Times reported earlier this month that Weinstein, 65, had reached eight previously undisclosed settle-

*In the lawsuit filed in Delaware’s Court of Chancery, Weinstein said he needed the information to prevent the company, in which he and his brother remain the largest investors, from being harmed by unjustified legal settlements.*

ments with women who accused him of sexual harassment and unwanted physical contact. The New Yorker magazine reported that 13 women had claimed that Weinstein sexually harassed or assaulted them. On Tuesday, an actress who accuses Weinstein of sexually assaulting her filed a negligence lawsuit against the company, saying it was aware Weinstein had previously settled other allegations of harassment and assault and should not have let her meet privately with the movie producer in a hotel room. The New York City Police Department has said it is investigating an allegation of sexual assault by Weinstein in 2004. The Los Angeles Police Department also said earlier this month that it is investigating a 2013 sexual assault allegation against movie producer Harvey Weinstein. Weinstein has denied having non-consensual sex with anyone. Reuters has been unable to independently confirm any of the allegations. In Thursday’s lawsuit, Weinstein said he also wants to investigate whether confidential information was leaked to the press, if the Weinstein Company’s

New alleged victim of Harvey Weinstein, Natassia Malthe, and her lawyer Gloria Allred hold a news conference in New York

board and executives wrongly terminated him as chief executive, and if the board is pursuing a “fire sale” of the company, according to the complaint and attached exhibits. “Mr. Weinstein believes that his email account -- which is the only one he used throughout the time he was employed by the company -- will contain information exonerating him, and therefore the company, from claims that may be asserted against them,” Weinstein’s lawyer wrote in an email to the Weinstein company, according to Thursday’s filing. The New York attorney general

has opened an investigation into sexual harassment and possible violations of civil rights laws at the Weinstein Company also.

Tech giants have their eyes set on helping out Puerto Rico get back on its feet after Hurricane Maria, looking to to pilot sustainable solutions to rebuild and reconnect areas that have been cut off from power. One tech giant, Elon Musk, has publicly offered to help rebuild Puerto Rico's electric grid after the island was devastated by Maria. Tesla would connect its Powerpacks to the grid, helping store energy generated by wind turbines or solar panels and smooth out gaps in the power they produce. The technology has already been tested on smaller islands, and Musk says there "is no scalability limit." Project Loon will deploy giant balloons into the stratosphere. They'll relay internet traffic to remote areas wirelessly, avoiding the cost and time of rewiring along the roads. The project recently received approval from the Federal Communications Commission to deploy in Puerto Rico. The technology has already been used in Peru, where thousands of homes were affected by extreme flooding. These projects could do more than just reconnect Puerto Rico; they could help hone concepts that could provide a more sustainable future.

A sign that reads "Send Tesla" is spelled out with remnants of a nearby house destroyed by Hurricane Irma as the occupant camps on the site twelve days after the devastating storm raked the island, on the northern shore of St. John, U.S. Virgin Islands September 16, 2017.

When Hurricane Maria crashed into Puerto Rico on September 20th, it found a vulnerable target. The island is facing an extreme financial crisis that's been building steam for decades; roughly 43 percent of its residents live in poverty. Its sole electric company, PREPA, is \$9 billion in debt and has been

**Without Dependable Power, The Island Faces A Health and Humanitarian Crisis**

**Tesla is Sending Hundreds Of Battery Packs To Puerto Rico In The Wake Of Major Hurricanes**

operating with outdated equipment for decades. Its power plants are an average of 44 years old and rely on outdated oil-fired systems, while most plants in the United States are about 18 years old and use newer natural-gas generators. PREPA filed for bankruptcy in July, calling its own infrastructure "degraded and unsafe."

Then the hurricanes hit. On September 7th, Hurricane Irma skirted Puerto Rico's northern coastline as a Category 5 storm, killing at least three people and knocking out power for more than 1 million residents. That weekend, PREPA was able to turn the lights back on for 70 percent of its affected customers, but others expected to wait months for power to return.

Hurricane Maria made its way up the Caribbean on September 20th, bringing winds of 140 MPH and dumping 25 inches of rain on Puerto Rico. It devastated the island. Maria knocked out PREPA's electrical systems, leaving 3.4 million people in the dark, with little hope of a quick recovery. Officials have suggested it will take four to six months for power to be restored.

Hundreds of power boxes have been

sent by Tesla to Puerto Rico.

Electricity is central to life on the island, just as it is in modern societies across the globe -- and, no, it's not just a matter of running televisions and toys. Puerto Rico's sole energy provider powers everything from hospitals and food-storage facilities to air-conditioning and communication services. Most of Puerto Rico today is running on generator power, leading to extremely long lines at temporary gas stations as residents attempt to secure a canister of the scarce resource. This week, the Federal Emergency Management Agency estimated that 42 percent of Puerto Ricans were without access to potable water. As of Friday, just nine of the island's 52 wastewater treatment facilities were operational.

**Elon Musk, Tesla's CEO, stands beside one of his Tesla power boxes.** Eighty percent of the island's overhead transmission lines were damaged in the storm.

While underground lines were mostly unaffected, most of Puerto Rico's power system is aboveground.

This devastation knocked out air-conditioning and refrigeration systems -- many people were stranded by debris clogging the island's roads, in need of food and ways to safely store it. In the most isolated cities, families are rationing crackers and watching their food and medicines go bad. Hospitals are another beast altogether. Roughly 70 percent of Puerto Rico's hospitals are not operational, but one facility that is, San Jorge Children's Hospital in San Juan, needs 2,000 gallons of diesel fuel every day to function outside of the power grid. With rampant supply and transportation issues, keeping the lights -- and lifesaving medical equipment -- on is nearly impossible. This week, San Jorge lost power for an eight-hour stretch, from 6 PM to 2 AM. Ventilators and other essential machines were kept on via emergency backup power, but the hospital was forced to discharge 40 patients. As of Thursday, the hospital had just enough diesel to last through this Saturday. The death toll is mounting, and there are far more fatalities linked to Hurricane Maria than has been officially reported, according to The Miami Herald. The official number is 16 deaths, though most hospital morgues (there are 18 operating at least partially) report being at full capacity. The longer power is out, the more likely it is that illness will spread. Without power to provide clean water, storage and medical

Most of Puerto Rico has been without power since the hurricanes hit.

Medical Center told CNN. "When there's a shortage of water and sanitation issues, it will come out. We are expecting something like that to happen." Billions of dollars in debt and facing an island-wide humanitarian crisis, Puerto Rico is

not equipped to rebuild its power grid on its own. One of the most likely paths it'll take is privatization.

**What's Next?**

Privatizing Puerto Rico's power grid isn't a new idea. Officials have been floating the possibility for years, and in June, four members of Puerto Rico's Financial Oversight and Management Board penned an op-ed for The Wall Street Journal called simply "Privatize Puerto Rico's Power."

Congress established this seven-person board under President Barack Obama in 2016, as part of the Puerto Rico Oversight, Management, and Economic Stability Act, which aimed to dig the territory (and PREPA) out of its massive debt via increased US oversight. The board is able to seize public assets, break union contracts and cut pensions, and its austerity measures include lowering the minimum wage from \$7.25 to \$4.25 an hour. PROMESA was contentious from the outset -- a handful of Democrats in Congress likened the oversight board to a form of colonialism, decrying how the legislation stripped away even more of Puerto Rico's autonomy. Despite PROMESA's financial goals, PREPA filed for bankruptcy just a year later. That was when four members of the oversight board wrote the following: "We believe that only privatization will enable PREPA to attract the investments it needs to lower costs and provide more reliable power throughout the island. By shifting from a government entity to a well-regulated private utility, PREPA can modernize its power supply, depoliticize

its management, reform pensions, and renegotiate labor and other contracts to operate more efficiently."

No power companies have made overt moves in Puerto Rico so far, but one US-based business springs to mind as a natural partner in this space: Tesla.

Not only is Tesla the leading name among renewable-energy companies, but it has experience in bringing power to another US island, Hawaii. Tesla and Hawaii's Kauai Island Utility Cooperative are currently maintaining a 45-acre solar farm in the hills of Kapaia, supported by a 53 MWh array of Tesla Powerpacks. The Powerpacks are es-

entially giant, commercial-grade white batteries that store the energy captured by solar panels, resulting in a more stable system and less wasted power. Batteries are essential for sustaining large-scale renewable-energy systems, and this technology is just now becoming a reality.

**Puerto Rico's hopes of bringing power back now rides on Tesla technology.**

Hawaii's energy problems mirror Puerto Rico's in a few ways: It's not connected to the mainland, so there's no backup if its power plants are destroyed, and it has some of the highest energy costs in the country. Puerto Rico's energy costs are generally two to three times those on the mainland.

Tesla has already shipped hundreds of Powerwalls -- the residential-size version of the Powerpack -- to Puerto Rico in an effort to help the commonwealth get back online. The company hasn't signaled any interest in setting up permanent shop in Puerto Rico, but if it does, it'll need to make a deal with the US government.

For example, The Intercept lists real-life problems caused by the partial privatization of PREPA's power grid:

It's not as if Prepa's existing experiments with privatization have been success stories. The utility currently purchases around 30 percent of its power from two private sources, an AES coal plant in Guayama and a natural gas plant in Peñuelas, owned by the Spanish company EcoEléctrica. AES sparked a major fight in the area and abroad for the plant's dumping of coal ash, which can seep into waterways and cause a number of health problems. Post-Irma, UTIER -- the Prepa utility workers' union -- denounced both of the private providers for shutting down during the storm to protect their infrastructure, straining both public providers and the unionized workforce. Were large swaths of Prepa to be privatized, it's also likely UTIER would be disbanded.

Privatization could modernize and stabilize Puerto Rico's energy infrastructure, but the island has a complicated history with both US businesses and the federal government. After Hurricane Maria, however, it doesn't have the luxury of negotiating. (Courtesy <https://www.engadget.com>)

**M/WBE SUPPLIER OPPORTUNITY**

Phonoscope, Inc. is bidding on Project Number 18-09-07 and 18-09-08 for the Houston Independent School District. We are looking for possible M/WBE suppliers to provide the following: Pull/Terminate Fiber Aerial/underground fiber construction, Build EMT's, Splice fiber, Install Vaults, Boring and Trenching. If you are interested in this opportunity, please contact Jerome Decuir via email at [jdecur@phonoscope.com](mailto:jdecur@phonoscope.com).

A new class-action lawsuit filed on behalf of 350 Harris County homeowners demands at least \$500 million after controlled releases from the Barker and Addicks reservoirs during Hurricane Harvey damaged or destroyed their homes.

The suit, filed Wednesday against the Harris County Flood Control District on behalf of 350 people in Harris County, is the latest in a bevy of lawsuits regarding the decision to release water from the reservoirs beginning on Aug. 28.

Anthony Buzbee, the attorney for the action filed Monday, said his firm plans to file both state and federal class-action suits on behalf of another 350 plaintiffs next week, in which they will demand another \$500 million.

Dozens of similar cases have been filed in federal court against the U.S. Army Corps of Engineers in the wake of the storm and subsequent flooding, prompting the nation's top claims court judge to consider consolidating some of the actions.

Like others before it, the new suit alleges that the Flood Control District's decision to release water from the reservoirs violated the takings clause of the Fifth Amendment, under which governments must provide "just compensation" for any private property taken for public use.

"When Harvey first hit the Houston area," the suit alleges, "plaintiffs' properties did not experience any, or minimal flooding."

The release of water from Addicks Dam. "Unfortunately, on Aug. 28, 2017, in the middle of the night, the Flood Control District decided to release massive amounts of water from (the reservoirs)," the suit continues. "The Flood Control District knew that the plaintiffs' properties would flood."

Whether those releases amount to a federal taking of private land remains to be seen.

**Owners Of Homes Damaged By Addicks, Barker Dam Releases Seek  
Hundreds Of Millions In Damages**

**Flood Control District Named in Two  
Class Action Suits Representing 700**

But environmental law and eminent domain experts have previously said that such legal claims could be challenging in court, as plaintiffs would likely need to prove that the Flood Control District intentionally flooded their homes, and its actions both worsened the flooding and were contrary to its operating agreement.

The two reservoirs and the nearby dams that fill them are located about 17 miles west of downtown Houston, and were built in the 1940s to protect downtown Houston after a deadly 1935 flood in 1935. The dams hold back floodwaters from Buffalo Bayou and other creeks. (Courtesy chron.com)

**Related**

**Houston Residents Blame City For  
Dam-Related Flooding**

**In fall 2009, the U.S. Army Corps of Engineers tagged West Houston's Addicks and Barker dams with an "extremely high risk of catastrophic failure" label**

A week after Hurricane Harvey saturated Houston with historic rainfall and as neighborhoods in the western part of the city are still underwater, residents claim in a class action that governmental mismanagement of two dams is to blame for the flooding that's forced them to evacuate their homes.

Buffalo Bayou is Houston's main watershed. It is fed by water released from the Addicks and Barker reservoirs.

The earthen dams straddle Interstate 10, 20 miles upstream from downtown Houston. The U.S. Army Corps of Engineers built them in the 1940s to hold back Buffalo Bayou after it flooded the city in 1935.

The Corps of Engineers usually releases water from the dams at the rate of 2,000 cubic feet per second, but the record-shattering 51 inches of rain Harvey dumped on Houston, starting Aug. 25 and continuing for four days, forced the Corps to increase the rate

to 13,000 CFS.

**Buffalo Bayou flooding shown across Allen Parkway close to downtown Houston.**

Officials said they had to drain the dams quickly to reduce the risk of a breach that would cripple downtown Houston, and to make room to absorb rainfall from more storms during hurricane season, which usually runs from June until November in Texas. The output had raised the roiling, chocolate-colored Buffalo Bayou to its all-time record of 62.7 feet by Sept. 1, and the swollen bayou has flooded 4,000 homes and apartments and numerous businesses.

Lead plaintiff Val Anthony Aldred filed a class-action lawsuit against the Harris County Flood Control District and Houston on Sunday night in Harris County District Court on behalf of all homeowners and commercial property affected by the rising waters of the Buffalo Bayou caused by the decision to release water from the Addicks and Barker reservoirs after Monday, Aug. 28.

Aldred is represented by the Houston-based Potts Law Firm.

"Each plaintiff named in the petition owned property that was not flooding after Hurricane Harvey sat over Harris County on Saturday and Sunday, but only began flooding when the Harris County Flood Control District and the City of Houston aided in the release of water from the Addicks and Barker Reservoirs. After the release, each property took on several feet of flood water," the firm said in a statement.

Aldred says in the complaint that Houston and the flood control district "failed to adequately prepare each reservoir for the possibility of flooding and have permitted unmitigated development around the reservoir such that they knew homes and businesses would flood in a heavy water event."

Class members seek damages for their repair

costs, diminished property values and lost income, claiming the release of water from the dams amounted to the government taking their property without paying them for it as required by Texas law, a legal claim known as inverse condemnation.

There's been at least one other complaint filed in Dallas County by a business owner seeking insurance coverage for damage caused by Hurricane Harvey.

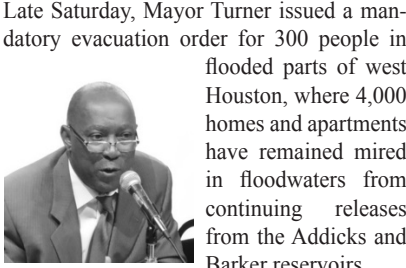

Asked for an exact number of homes that flooded in the area and when residents will be able to return, a Harris County Flood Control spokeswoman told Courthouse News on Tuesday, "We have no idea right now. They're still out there collecting information."

An Army Corps of Engineers spokesperson said Tuesday afternoon that Buffalo Bayou had receded to 58.61 feet at a section where it widens before flowing into downtown, but both the Harris County Flood Control District and Houston Mayor Sylvester Turner say it could be at least a week before the bayou goes down enough for residents to return to the area to survey their flood damage.

The Corps said in 2016 that if the dams failed, they could cause \$60 billion in damage to downtown Houston, the refinery-lined Houston Ship Channel and the 21 hospitals and 54 research institutions in the Texas Medical Center.

Harvey has forced the Corps of Engineers to suspend a \$75 million retrofit of the dams that was expected to be done by 2020 or 2021.

Late Saturday, Mayor Turner issued a mandatory evacuation order for 300 people in flooded parts of west Houston, where 4,000 homes and apartments have remained mired in floodwaters from continuing releases from the Addicks and Barker reservoirs.

**Mayor of Houston, Sylvester Turner**

Turner issued a mandatory evacuation or-

der late Saturday for 300 people who had hunkered down in their homes downstream of the dams, and power was shut off to the homes at 7 a.m. Sunday for the safety of residents and first responders.

"The situation of the release of water from the reservoir is not going to change in the next 10 days. Think of the first responders," Turner said on Saturday.

The Corps of Engineers said in a statement Sunday that it started a gradual reduction in the water release from the dams Sunday night.

"Downstream homeowners will see a gradual decrease in water elevations as releases are reduced. However, if the area experiences more rain before the reservoirs are empty, higher releases could become necessary again. Therefore, your local emergency management agencies may encourage you to stay out of flooded areas until Buffalo Bayou is within its banks," the Corps said.

A Freedom of Information Act request by the Sierra Club brought to light a memo the Corps of Engineers circulated internally in July 2010 that stated the dams "currently face significant risks of 'catastrophic failure.'"

**The Sierra Club brought to light a memo the Corps of Engineers circulated internally in July 2010 that stated the dams "currently face significant risks of 'catastrophic failure.'"**

The Corps of Engineers categorized them as "extremely high risk" to move them to the front of the line for federal funding for repairs.

Corps officers backtracked from the doomsday warnings in spring 2016, and said the dams are not in imminent danger of failing, but they were retrofitting the dams out of abundance of caution due to the potential impact of a failure on one of the nation's biggest cities.

"The fact that the Houston metropolitan area is the nation's fourth-largest population center is a primary concern," the agency said at the time. "Any dam safety issues at Addicks and Barker could have a far greater impact due to the magnitude of people and property downstream, as opposed to other dams around the country in rural or low-population density areas."

The earthen dam embankments are massive – Barker spans more than 13 miles and Addicks a little over 11 miles. The two reservoirs can store up to 410,000 acre feet of water, enough to cover 410,000 acres a foot deep. (Courtesy courthousenews.com)

Local Event

Lina Hidalgo For Harris County Judge Statement on Ed Emmett's Proposed Flood Alleviation Plan

Houston, Tx- Today, Ed Emmett called a press conference to announce “sweeping changes” to flood control in the region. Unfortunately for the 144,000 homes damaged during Hurricane Harvey, Emmett’s changes are too little, too late.

Where were Emmett’s new ideas after the Tax Day Flood and the Memorial Day Flood? Back then, he was too busy speaking to national newspapers, proposing a giant waste of money renovating the Astrodome.

Over the last decade, Emmett has failed to prioritize flood control. Emmett has only spent 3 cents out of every dollar on flood control. He spends 4 times more just on administrative bloat alone than he does on protecting our homes from floods. Just over a year ago, his longtime head of the Flood Control District claimed that Houston had no “looming issues”, and that it “only floods occasionally”. Now, for the third year in a row, Houston faces damage in the tens of billions of dollars to repair.

Harvey was the worst yet--but we don’t even know how bad future floods will be.

Now, many of our neighborhoods are STILL repairing their homes. Business owners are wondering whether they should move locations. Harris County residents are stuck waiting for help from FEMA and slow-moving insurance companies.

“Harris County needs someone with the foresight to see a disaster in the making. Ed Emmett got us into this mess by not making flood control a priority. He isn’t the person to get us out of it,” Lina Hidalgo stated on why Harris County needs new leadership.

“A Snow White Christmas” A Houston Premiere at THEATRE SUBURBIA Theatre Suburbia Presents Norm Foster’s”

Theatre Suburbia presents Norm Foster’s delightful holiday romp, A Snow White Christmas. Once upon a time, Prince Charming was riding through the forest when he found Snow White fast asleep. He leaned over and kissed her. She opened her eyes and sat up with a smile and everyone was happy. The Prince took Snow White to his palace where they were married and lived happily ever after ... or did they? A new story on the timeless fairy tale for the entire family. The cast of characters include Mary Mink as Snow White, David James Barron as Vincent Charming, Kali Marie Potter as Max, Ray Krolulik as Freddy, Francisco Guzman as Derek, Phyl Deany as the Fairly Good Mother, and Kate Seabrook as Prudence. Their performances are supported by Suzanne King as stage manager and Madeline at tech. The show was directed by Judy Reeves and Assistant Director Pamela Branstetter.

The show opens November 3, and runs through December 2, Friday and Saturday evenings at 8:30 pm and Sundays, at 3:00 pm (November 19 & 26, only) at Theatre Suburbia, in near northwest Houston at 4106 Way Out West, Suite N, near the intersection of West 43rd and Old Hempstead Highway. Reservations are strongly encouraged. Tickets: \$16 Adults, \$13 Students & Seniors, and \$13 Sunday Matinees. Cash, Check, and all Major Credit Cards Accepted. For reservations, call 713-682-3525, or check out our new online reservations at www.theatresuburbia.org. Theatre Suburbia is Northwest Houston’s longest running all volunteer playhouse. We are currently celebrating the first show of our 57th season and have now produced over 350 shows. Throughout the years, we have endeavored to provide quality, live theatre to the Houston area. For more information, visit the theatre web site, www.theatresuburbia.org.

Nine countries have issued health warnings for the plague

Authorities in Madagascar say the death toll from a plague outbreak has reached 124 people as the disease reaches the Indian Ocean island’s two biggest cities, according to the Associated Press.

Plague is endemic in Madagascar and the nation’s disaster risk management office says 1,192 cases have been identified. More than two-thirds of cases are of the more virulent pneumonic form. This year’s outbreak is unusual because it has reached the nation’s two largest cities, Antananarivo and Toamasina. here are two types of plagues affecting the area now, bubonic plague and

pneumonic plague. Bubonic plague affects the lymph nodes, leaving sufferers with painful, swollen necks, whereas pneumonic plague affects the lungs and can be transmitted via coughing and sneezing. While the bubonic plague is the more common strain, the pneumonic is more severe, killing anyone who goes untreated, according to the World Health Organization. Symptoms include the sudden onset of fever, chills, head and body aches, weakness, vomiting, and nausea.

## 林宥嘉微博簡介自稱禁欲系男子 還拉上胡歌霍建華

10月24日，有網友發現林宥嘉的微博簡介很有特點，他寫道：“人稱禁欲系歌手。禁欲系男子代表：胡歌、霍建華？”這樣的微博簡介真的非常可愛了。

據悉，早前林宥嘉在翻帖子時發現自己被封為“禁欲系”歌手，他表示拒絕還在臉書發文：“哎，歌聲被贊是很開心的啦，但是，說我‘長得很禁欲，配合歌聲簡直了’是什麼意思？！！什麼叫‘長得很禁欲’…最好給我說清楚喔”，但是在查明含義得知是贊美後，立馬向粉絲道歉，“不好意思，我太單純了，好的，我是禁欲系”。緊接著還火速改了微博簡介，“人稱禁欲系歌手。禁欲系男子代表：胡歌、霍建華。。。”讓網友大笑：“先科普壹下再拒絕吧”、“哈哈哈哈哈太可愛了”、“太蠢萌了”、“妳最禁欲系”！

## 8歲伊能靜展示好肌膚 感嘆減肥得對自己狠壹點

10月23日，伊能靜曬照稱：“對自己的美，狠壹點，千萬別手軟！！！”並且分享了自己減肥，運動的心得。視頻中的伊能靜身材纖細，皮膚光滑，她穿著白色上衣粉色褲子，十分少女，壹點都不像48歲。

之前她也曾曬出壹組健身美照，並發長文向大家分享了整個減肥歷程。自從生下女兒小米粒後就壹直在和減肥做鬥爭，在壹次次失敗後，終於找對了方法，如今已恢復產前身材的她依舊貌美如花。照片中伊能靜認真練習瑜伽，好身材壹覽無遺。

此照片曝光後，惹得眾網友紛紛圍觀並留言稱：“謝謝每次帶來正能量的妳。”“靜姐真的是好多女孩的榜樣，少女感十足！”“運動的樣子帥呆了，被驚到！”

## 《火王之千裏同風》拍攝轉場 陳柏霖感性表白房車

即將結束杭州拍攝飛往下一個地方。陪伴了我4, 5個月的房車。會想念的。

最近電視劇《火王之千裏同風》曝光了壹組陳柏霖最新劇照，彎弓射箭的樣子撩倒了不少粉絲。電視劇開拍已有數月，陳柏霖對於這進攻大陸市場的第壹部作品也是格外用心和專註，近日他還特意在微博透露，杭州的拍攝已經結束，即將飛往下壹個城市，更感性十足的表白陪伴自己四五個月的房車，也表白自己在劇組度過的時光：“會想念的”。

近日，正在緊張拍攝中的《火王之千裏同風》劇組公布了壹組最新劇照。其中的兩張射箭照片中，陳柏霖身穿帥氣的黑灰運動裝，正壹臉專註地彎弓射箭，不少網友看了直呼“老夫的少女心炸裂”。另壹張劇照中的他，身穿寶藍色襯衣，嘴角微微含笑，簡直“大仁哥”再現；還有壹張照片他身穿白襯衣、外搭西服，帥氣裝扮卻雙眉緊蹙，眼含怒氣，不知道要面對什麼人和事。看完這組劇照讓人更加期待陳柏霖在劇中的表現。

最近壹年，陳柏霖的行程可謂馬不停蹄，上真人秀、拍影視劇壹個都不耽誤，最近為了拍攝《火王》更是全心投入，在劇組壹住就是四五個月，更把房車當成了自己家。在20日他更新的壹條微博上說，“即將結束杭州拍攝飛往下壹個地方。陪伴了我4, 5個月的房車。會想念的。”

## 昆凌問誰最漂亮 嘴甜的小周周這樣回答

陶晶瑩25日曬出周傑倫夫婦送的滿月油飯，意外曝光兒子Romeo的正臉照，事後火速將照片刪除。江蕙當晚同洋分享周董兒子的滿月禮盒，不但記得將照片打上馬賽克，還寫下與2歲小周周的對話，被連續喊了5次姐姐，為此開心不已。

江蕙25日晚間在社交平臺上發文透露，收到周傑倫兒子的滿月油飯：“今天晚餐就吃這個，貼心的周董請大家吃油飯！”此外，令她開心的是，小周周不但喊壹連喊了她5次“姊姊”，當昆凌問說誰最漂亮？對方的回答更是令她海翻天：“大家知道答案是誰嗎？小周周竟

然指著我說：姊姊，那晚……自戀的壹直照鏡子！”

許多網友看完小周周和江蕙的對話後，紛紛嘴甜留言，“小周周很有眼光喔”、“二姐很可愛”、“小周周是位真誠的好孩子”，還有人開玩笑說，“周董終於兌現諾言了”。

事實上，周傑倫工作滿檔，Romeo已出生4個多月，但遲遲沒有空將油飯分送給大家，日前在演唱會

上，被江蕙笑說：“說要請我喝咖啡、說要送我吃油飯，結果也沒有。”當時周傑倫開玩笑回答，“明天就送800盒！”如今，周傑倫終於找到工作空檔，私下把油飯分送給藝人好友們，卻也在網路上引發不少討論。

## 大哥為何選四平街擺攤？ 林志穎曝感人主因

「小旋風」林志穎家中共有5個兄弟姊妹，被譽為「人生勝利組」的他，昨被報導家中大哥林志杰兩個月前在台北四平街開起賣腸粉的小吃攤，口碑不錯，昨林志穎與三弟林志鑫現身挺大哥，引發討論，今林志穎再度現身力挺哥哥，稍早更在臉書寫下大哥刻意選在四平街開店主因，與傳承

父志有關。

林志穎父親林德雄2011年過世，林志穎去年上節目見製作單位找演員扮成爸爸，不禁情緒難過失控喊卡，可見父親在他心中地位，稍早他在臉書透露四平街與四平陽光商圈，是爸爸還在世時辦公的地方，這裡因賣有許多平價的女人與小孩服飾，被稱作「女人街」，他小時候的衣物也是爸爸在這裡幫忙買回，這幾天重返四平街，令林志穎心頭揚起一股溫暖、樸實的感覺。

如今的四平街改為徒步區，吸引了更多類型的攤販進駐，大哥林志杰選擇回到位在這裡的林家門口擺攤工作，「像延續了爸爸的生活」，讓林志穎十分感動，他也知福惜福地說：「看著街上忙碌穿梭的人們，忽然很感謝在這裡默默努力生活的大家，還有給我們這麼多回憶的四平陽光商圈。」網友則讚說：「高而不傲又是人生勝利組，敬佩敬佩」、「我覺得大哥一定是很念舊的人，莫忘初衷的心態」、「沒想到林志穎也能這麼接地氣，讚」。
